Introduction

This document provides information to systems engineers and customers about the actual functional and performance capabilities of the product delivered to the customer.

This document is the Release Notes for Smart Call Home 4.3.2.7 that describes the caveats in this release.

Cisco Smart Call Home is an award-winning, embedded support feature available with Cisco SMARTnet and other qualifying service offers. It is available at no additional cost for a broad range of Cisco network devices.

Operational and Business Benefits

Problems are often identified and resolved before they affect your business. Smart Call Home provides the following operational and overall business benefits:

- Higher availability as a result of proactive, fast issue resolution
- Increased operational efficiency through less time troubleshooting
- Quick and convenient web-based access to personalized information

Feature Enhancement

This section provides a brief description of what is new or changed in this release:

- Resolved SCH:
 - Maintenance and security fixes
