TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common

control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
 - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
 - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
 - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or

documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill,

work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");
you may not use this file except in compliance with the License.
You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

Note: Other license terms may apply to certain, identified software files contained within or distributed with the accompanying software if such terms are included in the directory containing the accompanying software. Such other license terms will then apply in lieu of the terms of the software license above.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or

otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual,

worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents

of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common

control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
 - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
 - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
 - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or

documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill,

work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of,

the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

limitations under the License.

1.4 junit-jupiter-aggregator 5.8.2

1.4.1 Available under license :

Eclipse Public License - v 2.0

=====

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS ECLIPSE PUBLIC
LICENSE (AGREEMENT). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM
CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

1. Definitions

Contribution means:

- * **a)** in the case of the initial Contributor, the initial content Distributed under this Agreement, and
- * **b)** in the case of each subsequent Contributor:
 - * **i)** changes to the Program, and
 - * **ii)** additions to the Program;

where such changes and/or additions to the Program originate from and are Distributed by that particular Contributor. A Contribution originates from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include changes or additions to the Program that are not Modified Works.

Contributor means any person or entity that Distributes the Program.

Licensed Patents mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

Program means the Contributions Distributed in accordance with this Agreement.

Recipient means anyone who receives the Program under this Agreement or any Secondary License (as applicable), including Contributors.

Derivative Works shall mean any work, whether in Source Code or other form, that is based on (or derived from) the Program and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a

whole, an original work of authorship.

Modified Works shall mean any work in Source Code or other form that results from an addition to, deletion from, or modification of the contents of the Program, including, for purposes of clarity any new file in Source Code form that contains any contents of the Program. Modified Works shall not include works that contain only declarations, interfaces, types, classes, structures, or files of the Program solely in each case in order to link to, bind by name, or subclass the Program or Modified Works thereof.

Distribute means the acts of ****a)**** distributing or ****b)**** making available in any manner that enables the transfer of a copy.

Source Code means the form of a Program preferred for making modifications, including but not limited to software source code, documentation source, and configuration files.

Secondary License means either the GNU General Public License, Version 2.0, or any later versions of that license, including any exceptions or additional permissions as identified by the initial Contributor.

2. Grant of Rights

****a)**** Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, Distribute and sublicense the Contribution of such Contributor, if any, and such Derivative Works.

****b)**** Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in Source Code or other form. This patent license shall apply to the combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such addition of the Contribution causes such combination to be covered by the Licensed Patents. The patent license shall not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.

****c)**** Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein, no assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow Recipient to Distribute the Program, it is Recipient's responsibility to acquire that license before distributing the Program.

****d)**** Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license set forth in this Agreement.

****e)**** Notwithstanding the terms of any Secondary License, no Contributor makes additional grants to any Recipient (other than those set forth in this Agreement) as a result of such Recipient's receipt of the Program under the terms of a Secondary License (if permitted under the terms of Section 3).

3. Requirements

****3.1**** If a Contributor Distributes the Program in any form, then:

* **a)*** the Program must also be made available as Source Code, in accordance with section 3.2, and the Contributor must accompany the Program with a statement that the Source Code for the Program is available under this Agreement, and informs Recipients how to obtain it in a reasonable manner on or through a medium customarily used for software exchange; and

* **b)*** the Contributor may Distribute the Program under a license different than this Agreement, provided that such license:

* **i)*** effectively disclaims on behalf of all other Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;

* **ii)*** effectively excludes on behalf of all other Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;

* **iii)*** does not attempt to limit or alter the recipients' rights in the Source Code under section 3.2; and

* **iv)*** requires any subsequent distribution of the Program by any party to be under a license that satisfies the requirements of this section 3.

3.2 When the Program is Distributed as Source Code:

* **a)*** it must be made available under this Agreement, or if the Program **(i)** is combined with other material in a separate file or files made available under a Secondary License, and **(ii)** the initial Contributor attached to the Source Code the notice described in Exhibit A of this Agreement, then the Program may be made available under the terms of such Secondary Licenses, and

* **b)*** a copy of this Agreement must be included with each copy of the Program.

3.3 Contributors may not remove or alter any copyright, patent, trademark, attribution notices, disclaimers of warranty, or limitations of liability (notices) contained within the Program from any copy of the Program which they Distribute, provided that Contributors may add their own appropriate notices.

4. Commercial Distribution

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a commercial product offering, such Contributor (Commercial Contributor) hereby agrees to defend and indemnify every other Contributor (Indemnified Contributor) against any losses, damages and costs (collectively Losses) arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must: **a)** promptly notify the Commercial Contributor in writing of such claim, and **b)** allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's

responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

5. No Warranty

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, AND TO THE EXTENT PERMITTED BY APPLICABLE LAW, THE PROGRAM IS PROVIDED ON AN AS IS BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

6. Disclaimer of Liability

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, AND TO THE EXTENT PERMITTED BY APPLICABLE LAW, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

7. General

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. The Eclipse Foundation is the initial Agreement Steward. The Eclipse Foundation may assign the responsibility to serve as the Agreement Steward to a suitable

separate entity. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be Distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to Distribute the Program (including its Contributions) under the new version.

Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved. Nothing in this Agreement is intended to be enforceable by any entity that is not a Contributor or Recipient. No third-party beneficiary rights are created under this Agreement.

Exhibit A - Form of Secondary Licenses Notice

> This Source Code may also be made available under the following Secondary Licenses when the conditions for such availability set forth in the Eclipse Public License, v. 2.0 are satisfied: {name license(s), version(s), and exceptions or additional permissions here}.

Simply including a copy of this Agreement, including this Exhibit A is not sufficient to license the Source Code under Secondary Licenses.

If it is not possible or desirable to put the notice in a particular file, then You may include the notice in a location (such as a LICENSE file in a relevant directory) where a recipient would be likely to look for such a notice.

You may add additional accurate notices of copyright ownership.

Open Source Licenses

=====

This product may include a number of subcomponents with separate copyright notices and license terms. Your use of the source code for these subcomponents is subject to the terms and conditions of the subcomponent's license, as noted in the LICENSE-<subcomponent>.md files.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
 and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
 the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all

other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and

subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
 - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
 - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
 - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed

as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the

Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

1.7 findbugs-jsr305 3.0.2

1.7.1 Available under license :

License

THE WORK (AS DEFINED BELOW) IS PROVIDED UNDER THE TERMS OF THIS CREATIVE COMMONS PUBLIC LICENSE ("CCPL" OR "LICENSE"). THE WORK IS PROTECTED BY COPYRIGHT AND/OR OTHER APPLICABLE LAW. ANY USE OF THE WORK OTHER THAN AS AUTHORIZED UNDER THIS LICENSE OR COPYRIGHT LAW IS PROHIBITED.

BY EXERCISING ANY RIGHTS TO THE WORK PROVIDED HERE, YOU ACCEPT AND AGREE TO BE BOUND BY THE TERMS OF THIS LICENSE. THE LICENSOR GRANTS YOU THE RIGHTS CONTAINED HERE IN CONSIDERATION OF YOUR ACCEPTANCE OF SUCH TERMS AND CONDITIONS.

1. Definitions

1. "Collective Work" means a work, such as a periodical issue, anthology or encyclopedia, in which the Work in its entirety in unmodified form, along with a number of other contributions, constituting separate and independent works in themselves, are assembled into a collective whole. A work that constitutes a Collective Work will not be considered a Derivative Work (as defined below) for the purposes of this License.

2. "Derivative Work" means a work based upon the Work or upon the Work and other pre-existing works, such as a translation, musical arrangement, dramatization, fictionalization, motion picture version, sound recording, art reproduction, abridgment, condensation, or any other form in which the Work may be recast, transformed, or adapted, except that a work that constitutes a Collective Work will not be considered a Derivative Work for the purpose of this License. For the avoidance of doubt, where the Work is a musical composition or sound recording, the synchronization of the Work in timed-relation with a moving image ("synching") will be considered a Derivative Work for the purpose of this License.

3. "Licensor" means the individual or entity that offers the Work under the terms of this License.

4. "Original Author" means the individual or entity who created the Work.

5. "Work" means the copyrightable work of authorship offered under the terms of this License.

6. "You" means an individual or entity exercising rights under this License who has not previously violated the terms of this License with respect to the Work, or who has received express permission from the Licensor to exercise rights under this License despite a previous violation.

2. Fair Use Rights. Nothing in this license is intended to reduce, limit, or restrict any rights arising from fair use, first sale or other limitations on the exclusive rights of the copyright owner under copyright law or other applicable laws.

3. License Grant. Subject to the terms and conditions of this License, Licensor hereby grants You a worldwide, royalty-free, non-exclusive, perpetual (for the duration of the applicable copyright) license to exercise the rights in the Work as stated below:

1. to reproduce the Work, to incorporate the Work into one or more Collective Works, and to reproduce the Work as incorporated in the Collective Works;

2. to create and reproduce Derivative Works;

3. to distribute copies or phonorecords of, display publicly, perform publicly, and perform publicly by means of a digital audio transmission the Work including as incorporated in Collective Works;

4. to distribute copies or phonorecords of, display publicly, perform publicly, and perform publicly by means of a digital audio transmission Derivative Works.

5.

For the avoidance of doubt, where the work is a musical composition:

1. Performance Royalties Under Blanket Licenses. Licensor waives the exclusive right to collect, whether individually or via a performance rights society (e.g. ASCAP, BMI, SESAC), royalties for the public performance or public digital performance (e.g. webcast) of the Work.

2. Mechanical Rights and Statutory Royalties. Licensor waives the exclusive right to collect, whether individually or via a music rights agency or designated agent (e.g. Harry Fox Agency), royalties for any phonorecord You create from the Work ("cover version") and distribute, subject to the compulsory license created by 17 USC Section 115 of the US Copyright Act (or the equivalent in other jurisdictions).

6. Webcasting Rights and Statutory Royalties. For the avoidance of doubt, where the Work is a sound recording, Licensor waives the exclusive right to collect, whether individually or via a performance-rights society (e.g. SoundExchange), royalties for the public digital performance (e.g. webcast) of the Work, subject to the compulsory license created by 17 USC Section 114 of the US Copyright Act (or the equivalent in other jurisdictions).

The above rights may be exercised in all media and formats whether now known or hereafter devised. The above rights include the right to make such modifications as are technically necessary to exercise the rights in other media and formats. All rights not expressly granted by Licensor are hereby reserved.

4. Restrictions. The license granted in Section 3 above is expressly made subject to and limited by the following restrictions:

1. You may distribute, publicly display, publicly perform, or publicly digitally perform the Work only under the terms of this License, and You must include a copy of, or the Uniform Resource Identifier for, this License with every copy or phonorecord of the Work You distribute, publicly display, publicly perform, or publicly digitally perform. You may not offer or impose any terms on the Work that alter or restrict the terms of this License or the recipients' exercise of the rights granted hereunder. You may not sublicense the Work. You must keep intact all notices that refer to this License and to the disclaimer of warranties. You may not distribute, publicly display, publicly perform, or publicly digitally perform the Work with any technological measures that control access or use of the Work in a manner inconsistent with the terms of this License Agreement. The above applies to the Work as incorporated in a Collective Work, but this does not require the Collective Work apart from the Work itself to be made subject to the terms of this License. If You create a Collective Work, upon notice from any Licensor You must, to the extent practicable, remove from the Collective Work any credit as required by clause 4(b), as requested. If You create a Derivative Work, upon notice from any Licensor You must, to the extent practicable, remove from the Derivative Work any credit as required by clause 4(b), as requested.

2. If you distribute, publicly display, publicly perform, or publicly digitally perform the Work or any Derivative Works or Collective Works, You must keep intact all copyright notices for the Work and provide, reasonable to the medium or means You are utilizing: (i) the name of the Original Author (or pseudonym, if applicable) if supplied, and/or (ii) if the Original Author and/or Licensor designate another party or parties (e.g. a sponsor institute, publishing entity, journal) for attribution in Licensor's copyright notice, terms of service or by other reasonable means, the name of such party or parties; the title of the Work if supplied; to the extent reasonably practicable, the Uniform Resource Identifier, if any, that Licensor specifies to be associated with the Work, unless such URI does not refer to the copyright notice or licensing information for the Work; and in the case of a Derivative Work, a credit identifying the use of the Work in the Derivative Work (e.g., "French translation of the Work by Original Author," or "Screenplay based on original Work by Original Author"). Such credit may be implemented in any reasonable manner; provided, however, that in the case of a Derivative Work or Collective Work, at a minimum such credit will appear where any other comparable authorship credit appears and in a manner at least as prominent as such other comparable authorship credit.

5. Representations, Warranties and Disclaimer

UNLESS OTHERWISE MUTUALLY AGREED TO BY THE PARTIES IN WRITING, LICENSOR OFFERS THE WORK AS-IS AND MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND CONCERNING THE WORK, EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF TITLE, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NONINFRINGEMENT, OR THE ABSENCE OF LATENT OR OTHER DEFECTS, ACCURACY, OR THE PRESENCE OF ABSENCE OF ERRORS, WHETHER OR NOT DISCOVERABLE. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OF IMPLIED WARRANTIES, SO SUCH EXCLUSION MAY NOT APPLY TO YOU.

6. Limitation on Liability. EXCEPT TO THE EXTENT REQUIRED BY APPLICABLE LAW, IN NO EVENT WILL LICENSOR BE LIABLE TO YOU ON ANY LEGAL THEORY FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES ARISING OUT OF THIS LICENSE OR THE USE OF THE WORK, EVEN IF LICENSOR HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

7. Termination

1. This License and the rights granted hereunder will terminate automatically upon any breach by You of the terms of this License. Individuals or entities who have received Derivative Works or Collective Works from You under this License, however, will not have their licenses terminated provided such individuals or entities remain in full compliance with those licenses. Sections 1, 2, 5, 6, 7, and 8 will survive any termination of this License.

2. Subject to the above terms and conditions, the license granted here is perpetual (for the duration of the applicable copyright in the Work). Notwithstanding the above, Licensor reserves the right to release the Work under different license terms or to stop distributing the Work at any time; provided, however that any such election will not serve to withdraw this License (or any other license that has been, or is required to be, granted under the terms of this License), and this License will continue in full force and effect unless terminated as stated above.

8. Miscellaneous

1. Each time You distribute or publicly digitally perform the Work or a Collective Work, the Licensor offers to the recipient a license to the Work on the same terms and conditions as the license granted to You under this License.

2. Each time You distribute or publicly digitally perform a Derivative Work, Licensor offers to the recipient a license to the original Work on the same terms and conditions as the license granted to You under this License.

3. If any provision of this License is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this License, and without further action by the parties to this agreement, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

4. No term or provision of this License shall be deemed waived and no breach consented to unless such waiver or consent shall be in writing and signed by the party to be charged with such waiver or consent.

5. This License constitutes the entire agreement between the parties with respect to the Work licensed here. There are no understandings, agreements or representations with respect to the Work not specified here. Licensor shall not be bound by any additional provisions that may appear in any communication from You. This License may not be modified without the mutual written agreement of the Licensor and You.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or

Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work

or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work

by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

1.11 jackson-bom 2.12.5

1.11.1 Available under license :

Apache License
Version 2.0, January 2004
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or

Derivative Works a copy of this License; and

- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

1.13 aws-java-sdk-::-services-::-amazon- dynamodb 2.17.52

1.13.1 Available under license :

Apache License
Version 2.0, January 2004

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally

submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or

implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");
you may not use this file except in compliance with the License.
You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

Note: Other license terms may apply to certain, identified software files contained within or distributed with the accompanying software if such terms are included in the directory containing the accompanying software. Such other license terms will then apply in lieu of the terms of the software license above.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner

or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
 - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and

- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions

of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

*signed* integers. See the from* functions below for more\r\n * convenient ways of constructing Longs.\r\n\r\n * \r\n * The internal representation of a long is the two given signed, 32-bit values.\r\n * We use 32-bit pieces because these
are the size of integers on which\r\n * Javascript performs bit-operations. For operations like addition and\r\n * multiplication, we split each number into 16-bit pieces, which can easily be\r\n * multiplied within Javascript's
floating-point representation without overflow\r\n * or change in sign.\r\n\r\n * In the algorithms below, we
frequently reduce the negative case to the\r\n * positive case by negating the input(s) and then post-processing the
result.\r\n\r\n * Note that we must ALWAYS check specially whether those values are MIN_VALUE\r\n * (-2^63)

```

```

because -MIN_VALUE == MIN_VALUE (since 2^63 cannot be represented as a positive number, it
overflows back into a negative). Not handling this case would often result in infinite recursion.
@param {number} low The low (signed) 32 bits of the long.
@param {number} high The high (signed) 32
bits of the long.
@constructor
@final
Kotlin.Long = function(low, high) {
    @private
    this.low_ = low | 0; // force into 32 signed bits.
    @private
    this.high_ = high | 0; // force into 32 signed
bits.
};
Kotlin.Long.$metadata$ = {
    kind: "class",
    simpleName: "Long",
    interfaces: []
};
// NOTE: Common constant values ZERO, ONE, NEG_ONE, etc. are defined below
// from methods on which they depend.
A cache of the Long representations of small
integer values.
@type {Object}
@private
Kotlin.Long.IntCache_ = {};
Returns a Long representing the given (32-bit) integer value.
@param {number} value The 32-bit integer in
question.
@return {!Kotlin.Long} The corresponding Long value.
Kotlin.Long.fromInt =
function(value) {
    if (-128 <= value && value < 128) {
        var cachedObj = Kotlin.Long.IntCache_[value];
        if (cachedObj) {
            return cachedObj;
        }
        var obj = new Kotlin.Long(value | 0, value < 0 ? -1 :
0);
        if (-128 <= value && value < 128) {
            Kotlin.Long.IntCache_[value] = obj;
        }
        return
obj;
};
Converts this number value to `Long`. The fractional part, if any, is rounded
down. Returns zero if this `Double` value is `NaN`, `Long.MIN_VALUE` if it's less than
`Long.MIN_VALUE`, `Long.MAX_VALUE` if it's bigger than `Long.MAX_VALUE`.
@param
{number} value The number in question.
@return {!Kotlin.Long} The corresponding Long value.
Kotlin.Long.fromNumber = function(value) {
    if (isNaN(value)) {
        return Kotlin.Long.ZERO;

`public inline operator fun BooleanArray.component4(): Boolean` Returns 4th element from the collection.

`@kotlin.internal.InlineOnly`

`public inline operator fun CharArray.component4(): Char` Returns 5th element from the collection.

`@kotlin.internal.InlineOnly`

`public inline operator fun <T> Array<out T>.component5(): T` Returns 5th element from the collection.

`@kotlin.internal.InlineOnly`

`public inline operator fun ByteArray.component5(): Byte` Returns 5th element from the collection.

`@kotlin.internal.InlineOnly`

`public inline operator fun ShortArray.component5(): Short` Returns 5th element from the collection.

`@kotlin.internal.InlineOnly`

`public inline operator fun IntArray.component5(): Int` Returns 5th element from the collection.

`@kotlin.internal.InlineOnly`

`public inline operator fun LongArray.component5(): Long` Returns 5th element from the collection.

`@kotlin.internal.InlineOnly`

`public inline operator fun FloatArray.component5(): Float` Returns 5th element from the collection.

`@kotlin.internal.InlineOnly`

`public inline operator fun DoubleArray.component5(): Double` Returns 5th element from the collection.

`@kotlin.internal.InlineOnly`

`public inline operator fun BooleanArray.component5(): Boolean` Returns 5th element from the collection.

`@kotlin.internal.InlineOnly`

`public inline operator fun CharArray.component5(): Char` Returns true if [element] is found in the array.

`public operator fun <@kotlin.internal.OnlyInputTypes T> Array<out T>.contains(element: T): Boolean` Returns true if [element] is found in the array.

`public operator fun ByteArray.contains(element: Byte): Boolean` Returns true if [element] is found in the array.

`public operator fun ShortArray.contains(element: Short): Boolean` Returns true if [element] is found in the array.

`public operator fun IntArray.contains(element: Int): Boolean` Returns true if [element] is found in the array.

`public operator fun LongArray.contains(element: Long): Boolean` Returns true if [element] is found in the array.

`public operator fun FloatArray.contains(element: Float): Boolean` Returns true if [element] is found in the array.

`public operator fun DoubleArray.contains(element: Double): Boolean` Returns true if [element] is found in the array.

`public operator fun BooleanArray.contains(element: Boolean): Boolean` Returns true if [element] is found in the array.

`public operator fun CharArray.contains(element: Char): Boolean` Returns an element at the given [index] or throws an [IndexOutOfBoundsException] if the [index] is out of bounds of this array.

`@sample`

`samples.collections.Collections.Elements.elementAt`

`public expect fun <T> Array<out T>.elementAt(index: Int): T` Returns an element at the given [index] or throws an [IndexOutOfBoundsException] if the [index] is out of bounds of this array.

`@sample`

`samples.collections.Collections.Elements.elementAt`

`public expect fun ByteArray.elementAt(index: Int): Byte` Returns an element at the given [index] or throws an [IndexOutOfBoundsException] if the [index] is out of bounds of this array.

`@sample`

`samples.collections.Collections.Elements.elementAt`

`public expect fun ShortArray.elementAt(index: Int): Short` Returns an element at the given [index] or throws an [IndexOutOfBoundsException] if the [index] is out of bounds of this array.

`@sample`

`samples.collections.Collections.Elements.elementAt`

`public expect fun IntArray.elementAt(index: Int): Int` Returns an element at the given [index] or throws an [IndexOutOfBoundsException] if the [index] is out of bounds of this array.

`@sample`

`samples.collections.Collections.Elements.elementAt`

`public expect fun LongArray.elementAt(index: Int): Long` Returns an element at the given [index] or throws an [IndexOutOfBoundsException] if the [index] is out of bounds of this array.

`@sample`

`samples.collections.Collections.Elements.elementAt`

`public expect fun FloatArray.elementAt(index: Int): Float` Returns an element at the given [index] or throws an [IndexOutOfBoundsException] if the [index] is out of bounds of this array.

return toTypedArray().apply { sortedWith(comparator) }.asList()
}`
Returns a list of all elements sorted according to the specified [comparator].
`public fun BooleanArray.sortedWith(comparator: Comparator<in Boolean>): List<Boolean> {
return toTypedArray().apply { sortedWith(comparator) }.asList()
}`
Returns a list of all elements sorted according to the specified [comparator].
`public fun CharArray.sortedWith(comparator: Comparator<in Char>): List<Char> {
return toTypedArray().apply { sortedWith(comparator) }.asList()
}`
Returns a [List] that wraps the original array.
`expect fun <T> Array<out T>.asList(): List<T>`
Returns a [List] that wraps the original array.
`expect fun ByteArray.asList(): List<Byte>`
Returns a [List] that wraps the original array.
`expect fun ShortArray.asList(): List<Short>`
Returns a [List] that wraps the original array.
`expect fun IntArray.asList(): List<Int>`
Returns a [List] that wraps the original array.
`expect fun LongArray.asList(): List<Long>`
Returns a [List] that wraps the original array.
`expect fun FloatArray.asList(): List<Float>`
Returns a [List] that wraps the original array.
`expect fun DoubleArray.asList(): List<Double>`
Returns a [List] that wraps the original array.
`expect fun BooleanArray.asList(): List<Boolean>`
Returns a [List] that wraps the original array.
`expect fun CharArray.asList(): List<Char>`
Returns `true` if the two specified arrays are *deeply* equal to one another, i.e. contain the same number of the same elements in the same order.
If two corresponding elements are nested arrays, they are also compared deeply.
If any of arrays contains itself on any nesting level the behavior is undefined.
The elements of other types are compared for equality with the [equals][Any.equals] function.
For floating point numbers it means that `NaN` is equal to itself and `-0.0` is not equal to `0.0`.
`@SinceKotlin("1.1") expect infix fun <T> Array<out T>.contentDeepEquals(other: Array<out T>): Boolean`
Returns a hash code based on the contents of this array as if it is [List].
Nested arrays are treated as lists too.
If any of arrays contains itself on any nesting level the behavior is undefined.
`@SinceKotlin("1.1") expect fun <T> Array<out T>.contentDeepHashCode(): Int`
Returns a string representation of the contents of this array as if it is a [List].
Nested arrays are treated as lists too.
If any of arrays contains itself on any nesting level that reference is rendered as `[...]` to prevent recursion.
`@sample samples.collections.Arrays.ContentOperations.contentDeepToString`
`@SinceKotlin("1.1") expect fun <T> Array<out T>.contentDeepToString(): String`
Returns `true` if the two specified arrays are *structurally* equal to one another, i.e. contain the same number of the same elements in the same order.
The elements are compared for equality with the [equals][Any.equals] function.
For floating point numbers it means that `NaN` is equal to itself and `-0.0` is not equal to `0.0`.
`@SinceKotlin("1.1") expect infix fun <T> Array<out T>.contentEquals(other: Array<out T>): Boolean`
Returns `true` if the two specified arrays are *structurally* equal to one another, i.e. contain the same number of the same elements in the same order.
The elements are compared for equality with the [equals][Any.equals] function.
For floating point numbers it means that `NaN` is equal to itself and `-0.0` is not equal to `0.0`.
`@SinceKotlin("1.1") expect infix fun ByteArray.contentEquals(other: ByteArray): Boolean`
Returns `true` if the two specified arrays are *structurally* equal to one another, i.e. contain the same number of the same elements in the same order.
The elements are compared for equality with the [equals][Any.equals] function.
For floating point numbers it means that `NaN` is equal to itself and `-0.0` is not equal to `0.0`.

equal to `0.0`.
`@SinceKotlin("1.1")`
`public expect infix fun ShortArray.contentEquals(other: ShortArray): Boolean`
Returns `true` if the two specified arrays are *structurally* equal to one another, i.e. contain the same number of the same elements in the same order. The elements are compared for equality with the `[equals][Any.equals]` function. For floating point numbers it means that `NaN` is equal to itself and `-0.0` is not equal to `0.0`.

`@SinceKotlin("1.1")`
`public expect infix fun IntArray.contentEquals(other: IntArray): Boolean`
Returns `true` if the two specified arrays are *structurally* equal to one another, i.e. contain the same number of the same elements in the same order. The elements are compared for equality with the `[equals][Any.equals]` function. For floating point numbers it means that `NaN` is equal to itself and `-0.0` is not equal to `0.0`.

`@SinceKotlin("1.1")`
`public expect infix fun LongArray.contentEquals(other: LongArray): Boolean`
Returns `true` if the two specified arrays are *structurally* equal to one another, i.e. contain the same number of the same elements in the same order. The elements are compared for equality with the `[equals][Any.equals]` function. For floating point numbers it means that `NaN` is equal to itself and `-0.0` is not equal to `0.0`.

`@SinceKotlin("1.1")`
`public expect infix fun FloatArray.contentEquals(other: FloatArray): Boolean`
Returns `true` if the two specified arrays are *structurally* equal to one another, i.e. contain the same number of the same elements in the same order. The elements are compared for equality with the `[equals][Any.equals]` function. For floating point numbers it means that `NaN` is equal to itself and `-0.0` is not equal to `0.0`.

`@SinceKotlin("1.1")`
`public expect infix fun DoubleArray.contentEquals(other: DoubleArray): Boolean`
Returns `true` if the two specified arrays are *structurally* equal to one another, i.e. contain the same number of the same elements in the same order. The elements are compared for equality with the `[equals][Any.equals]` function. For floating point numbers it means that `NaN` is equal to itself and `-0.0` is not equal to `0.0`.

`@SinceKotlin("1.1")`
`public expect infix fun BooleanArray.contentEquals(other: BooleanArray): Boolean`
Returns `true` if the two specified arrays are *structurally* equal to one another, i.e. contain the same number of the same elements in the same order. The elements are compared for equality with the `[equals][Any.equals]` function. For floating point numbers it means that `NaN` is equal to itself and `-0.0` is not equal to `0.0`.

`@SinceKotlin("1.1")`
`public expect infix fun CharArray.contentEquals(other: CharArray): Boolean`
Returns a hash code based on the contents of this array as if it is `[List]`.

`@SinceKotlin("1.1")`
`public expect fun <T> Array<out T>.contentHashCode(): Int`
Returns a hash code based on the contents of this array as if it is `[List]`.

`@SinceKotlin("1.1")`
`public expect fun ByteArray.contentHashCode(): Int`
Returns a hash code based on the contents of this array as if it is `[List]`.

`@SinceKotlin("1.1")`
`public expect fun ShortArray.contentHashCode(): Int`
Returns a hash code based on the contents of this array as if it is `[List]`.

`@SinceKotlin("1.1")`
`public expect fun IntArray.contentHashCode(): Int`
Returns a hash code based on the contents of this array as if it is `[List]`.

`@SinceKotlin("1.1")`
`public expect fun LongArray.contentHashCode(): Int`
Returns a hash code based on the contents of this array as if it is `[List]`.

`@SinceKotlin("1.1")`
`public expect fun FloatArray.contentHashCode(): Int`
Returns a hash code based on the contents of this array as if it is `[List]`.

`@SinceKotlin("1.1")`
`public expect fun DoubleArray.contentHashCode(): Int`
Returns a hash code based on the contents of this array as if it is `[List]`.

`@SinceKotlin("1.1")`
`public expect fun BooleanArray.contentHashCode(): Int`
Returns a hash code based on the contents of this array as if it is `[List]`.

`@SinceKotlin("1.1")`
`public expect fun CharArray.contentHashCode(): Int`
Returns a string representation of the contents of the specified array as if it is `[List]`.

`@sample` `samples.collections.Arrays.ContentOperations.contentToString`

`@SinceKotlin("1.1")`
`public expect fun <T> Array<out T>.contentToString(): String`
Returns a string representation of the contents of the specified array as if it is `[List]`.

`@sample` `samples.collections.Arrays.ContentOperations.contentToString`

`@SinceKotlin("1.1")`
`public expect fun ByteArray.contentToString(): String`
Returns a string representation of the contents of the specified array as if it is `[List]`.

`@sample` `samples.collections.Arrays.ContentOperations.contentToString`

`@SinceKotlin("1.1")`
`public expect fun ShortArray.contentToString(): String`
Returns a string representation of the contents of the specified array as if it is `[List]`.

`@sample`

```

is a copy of the specified range of the original array.

`fromIndex` the start of the range (inclusive), must be in `0..array.size`

`toIndex` the end of the range (exclusive), must be in `fromIndex..array.size`

`FloatArray.copyOfRange(fromIndex: Int, toIndex: Int): FloatArray`

Returns a new array which is a copy of the specified range of the original array.

`fromIndex` the start of the range (inclusive), must be in `0..array.size`

`toIndex` the end of the range (exclusive), must be in `fromIndex..array.size`

`DoubleArray.copyOfRange(fromIndex: Int, toIndex: Int): DoubleArray`

Returns a new array which is a copy of the specified range of the original array.

`fromIndex` the start of the range (inclusive), must be in `0..array.size`

`toIndex` the end of the range (exclusive), must be in `fromIndex..array.size`

`BooleanArray.copyOfRange(fromIndex: Int, toIndex: Int): BooleanArray`

Returns a new array which is a copy of the specified range of the original array.

`fromIndex` the start of the range (inclusive), must be in `0..array.size`

`toIndex` the end of the range (exclusive), must be in `fromIndex..array.size`

`CharArray.copyOfRange(fromIndex: Int, toIndex: Int): CharArray`

Fills this array or its subrange with the specified `[element]` value.

`fromIndex` the start of the range (inclusive), 0 by default.

`toIndex` the end of the range (exclusive), size of this array by default.

throws `IndexOutOfBoundsException` if `[fromIndex]` is less than zero or `[toIndex]` is greater than the size of this array.

throws `IllegalArgumentException` if `[fromIndex]` is greater than `[toIndex]`.

`<T> Array<T>.fill(element: T, fromIndex: Int = 0, toIndex: Int = size): Unit`

Fills this array or its subrange with the specified `[element]` value.

`fromIndex` the start of the range (inclusive), 0 by default.

`toIndex` the end of the range (exclusive), size of this array by default.

throws `IndexOutOfBoundsException` if `[fromIndex]` is less than zero or `[toIndex]` is greater than the size of this array.

throws `IllegalArgumentException` if `[fromIndex]` is greater than `[toIndex]`.

`ByteArray.fill(element: Byte, fromIndex: Int = 0, toIndex: Int = size): Unit`

Fills this array or its subrange with the specified `[element]` value.

`fromIndex` the start of the range (inclusive), 0 by default.

`toIndex` the end of the range (exclusive), size of this array by default.

throws `IndexOutOfBoundsException` if `[fromIndex]` is less than zero or `[toIndex]` is greater than the size of this array.

throws `IllegalArgumentException` if `[fromIndex]` is greater than `[toIndex]`.

`ShortArray.fill(element: Short, fromIndex: Int = 0, toIndex: Int = size): Unit`

Fills this array or its subrange with the specified `[element]` value.

`fromIndex` the start of the range (inclusive), 0 by default.

`toIndex` the end of the range (exclusive), size of this array by default.

throws `IndexOutOfBoundsException` if `[fromIndex]` is less than zero or `[toIndex]` is greater than the size of this array.

throws `IllegalArgumentException` if `[fromIndex]` is greater than `[toIndex]`.

`IntArray.fill(element: Int, fromIndex: Int = 0, toIndex: Int = size): Unit`

Fills this array or its subrange with the specified `[element]` value.

`fromIndex` the start of the range (inclusive), 0 by default.

`toIndex` the end of the range (exclusive), size of this array by default.

throws `IndexOutOfBoundsException` if `[fromIndex]` is less than zero or `[toIndex]` is greater than the size of this array.

throws `IllegalArgumentException` if `[fromIndex]` is greater than `[toIndex]`.

`LongArray.fill(element: Long, fromIndex: Int = 0, toIndex: Int = size): Unit`

Fills this array or its subrange with the specified `[element]` value.

`fromIndex` the start of the range (inclusive), 0 by default.

`toIndex` the end of the range (exclusive), size of this array by default.

throws `IndexOutOfBoundsException` if `[fromIndex]` is less than zero or `[toIndex]` is greater than the size of this array.

throws `IllegalArgumentException` if `[fromIndex]` is greater than `[toIndex]`.

`FloatArray.fill(element: Float, fromIndex: Int = 0, toIndex: Int = size): Unit`

Fills this array or its subrange with the specified `[element]` value.

`fromIndex` the start of the range (inclusive), 0 by default.

`toIndex` the end of the range (exclusive), size of this array by default.

throws `IndexOutOfBoundsException` if `[fromIndex]` is less than zero or `[toIndex]` is greater than the size of this array.

throws `IllegalArgumentException` if `[fromIndex]` is greater than `[toIndex]`.

`DoubleArray.fill(element: Double, fromIndex: Int = 0, toIndex: Int = size): Unit`

Fills this

array or its subrange with the specified [element] value.\n * \n * @param fromIndex the start of the range (inclusive), 0 by default.\n * @param toIndex the end of the range (exclusive), size of this array by default.\n * \n * @throws IndexOutOfBoundsException if [fromIndex] is less than zero or [toIndex] is greater than the size of this array.\n * @throws IllegalArgumentException if [fromIndex] is greater than [toIndex].\n

```

V> BooleanArray.associate(transform: (Boolean) -> Pair<K, V>): Map<K, V> {
  val capacity = mapCapacity(size).coerceAtLeast(16)
  return associateTo(LinkedHashMap<K, V>(capacity),
    transform)
}

Returns a [Map] containing key-value pairs provided by [transform] function applied to elements of the given array.
If any of two pairs would have the same key the last one gets added to the map.
The returned map preserves the entry iteration order of the original array.

public inline fun <K, V> CharArray.associate(transform: (Char) -> Pair<K, V>): Map<K, V> {
  val capacity = mapCapacity(size).coerceAtLeast(16)
  return associateTo(LinkedHashMap<K, V>(capacity),
    transform)
}

Returns a [Map] containing the elements from the given array indexed by the key returned from [keySelector] function applied to each element.
If any two elements would have the same key returned by [keySelector] the last one gets added to the map.
The returned map preserves the entry iteration order of the original array.

public inline fun <T, K> Array<out T>.associateBy(keySelector: (T) -> K): Map<K, T> {
  val capacity = mapCapacity(size).coerceAtLeast(16)
  return associateByTo(LinkedHashMap<K, T>(capacity), keySelector)
}

Returns a [Map] containing the elements from the given array indexed by the key returned from [keySelector] function applied to each element.
If any two elements would have the same key returned by [keySelector] the last one gets added to the map.
The returned map preserves the entry iteration order of the original array.

public inline fun <K> ByteArray.associateBy(keySelector: (Byte) -> K): Map<K, Byte> {
  val capacity = mapCapacity(size).coerceAtLeast(16)
  return associateByTo(LinkedHashMap<K, Byte>(capacity), keySelector)
}

Returns a [Map] containing the elements from the given array indexed by the key returned from [keySelector] function applied to each element.
If any two elements would have the same key returned by [keySelector] the last one gets added to the map.
The returned map preserves the entry iteration order of the original array.

public inline fun <K> ShortArray.associateBy(keySelector: (Short) -> K): Map<K, Short> {
  val capacity = mapCapacity(size).coerceAtLeast(16)
  return associateByTo(LinkedHashMap<K, Short>(capacity), keySelector)
}

Returns a [Map] containing the elements from the given array indexed by the key returned from [keySelector] function applied to each element.
If any two elements would have the same key returned by [keySelector] the last one gets added to the map.
The returned map preserves the entry iteration order of the original array.

public inline fun <K> IntArray.associateBy(keySelector: (Int) -> K): Map<K, Int> {
  val capacity = mapCapacity(size).coerceAtLeast(16)
  return associateByTo(LinkedHashMap<K, Int>(capacity), keySelector)
}

Returns a [Map] containing the elements from the given array indexed by the key returned from [keySelector] function applied to each element.
If any two elements would have the same key returned by [keySelector] the last one gets added to the map.
The returned map preserves the entry iteration order of the original array.

public inline fun <K> LongArray.associateBy(keySelector: (Long) -> K): Map<K, Long> {
  val capacity = mapCapacity(size).coerceAtLeast(16)
  return associateByTo(LinkedHashMap<K, Long>(capacity), keySelector)
}

Returns a [Map] containing the elements from the given array indexed by the key returned from [keySelector] function applied to each element.
If any two elements would have the same key returned by [keySelector] the last one gets added to the map.
The returned map preserves the entry iteration order of the original array.

public inline fun <K> FloatArray.associateBy(keySelector: (Float) -> K): Map<K, Float> {
  val capacity = mapCapacity(size).coerceAtLeast(16)
  return associateByTo(LinkedHashMap<K, Float>(capacity), keySelector)
}

Returns a [Map] containing the elements from the given array indexed by the key returned from [keySelector] function applied to each element.
If any two elements would have the same key returned by [keySelector] the last one gets added to the map.
The returned map preserves the entry iteration order of the original array.

public inline fun <K> DoubleArray.associateBy(keySelector: (Double) -> K): Map<K, Double> {
  val capacity = mapCapacity(size).coerceAtLeast(16)
  return associateByTo(LinkedHashMap<K, Double>(capacity), keySelector)
}

Returns a [Map] containing the elements from the given array indexed by the key returned from [keySelector] function applied to each element.
If any two elements would have the same key returned by [keySelector] the last one gets added to the map.
The returned map preserves the entry iteration order of the original array.

elements would have the same key returned by [keySelector] the last one gets added to the map.\n * \n * The
returned map preserves the entry iteration order of the original array.\n */\npublic inline fun <K, V>
DoubleArray.associateBy(keySelector: (Double) -> K, valueTransform: (Double) -> V): Map<K, V> {\n  val
capacity = mapCapacity(size).coerceAtLeast(16)\n  return associateByTo(LinkedHashMap<K, V>(capacity),
keySelector, valueTransform)\n}\n\n/**\n * Returns a [Map] containing the values provided by [valueTransform]

```

and indexed by [keySelector] functions applied to elements of the given array.

If any two elements would have the same key returned by [keySelector] the last one gets added to the map.

The returned map preserves the entry iteration order of the original array.

```

public inline fun <K, V> BooleanArray.associateBy(keySelector: (Boolean) -> K, valueTransform: (Boolean) -> V): Map<K, V> {
    val capacity = mapCapacity(size).coerceAtLeast(16)
    return associateByTo(LinkedHashMap<K, V>(capacity), keySelector, valueTransform)
}

```

Returns a [Map] containing the values provided by [valueTransform] and indexed by [keySelector] functions applied to elements of the given array.

If any two elements would have the same key returned by [keySelector] the last one gets added to the map.

The returned map preserves the entry iteration order of the original array.

```

public inline fun <K, V> CharArray.associateBy(keySelector: (Char) -> K, valueTransform: (Char) -> V): Map<K, V> {
    val capacity = mapCapacity(size).coerceAtLeast(16)
    return associateByTo(LinkedHashMap<K, V>(capacity), keySelector, valueTransform)
}

```

Populates and returns the [destination] mutable map with key-value pairs, where key is provided by the [keySelector] function applied to each element of the given array and value is the element itself.

If any two elements would have the same key returned by [keySelector] the last one gets added to the map.

```

public inline fun <T, K, M : MutableMap<in K, in T>> Array<out T>.associateByTo(destination: M, keySelector: (T) -> K): M {
    for (element in this) {
        destination.put(keySelector(element), element)
    }
    return destination
}

```

Populates and returns the [destination] mutable map with key-value pairs, where key is provided by the [keySelector] function applied to each element of the given array and value is the element itself.

If any two elements would have the same key returned by [keySelector] the last one gets added to the map.

```

public inline fun <K, M : MutableMap<in K, in Byte>> ByteArray.associateByTo(destination: M, keySelector: (Byte) -> K): M {
    for (element in this) {
        destination.put(keySelector(element), element)
    }
    return destination
}

```

Populates and returns the [destination] mutable map with key-value pairs, where key is provided by the [keySelector] function applied to each element of the given array and value is the element itself.

If any two elements would have the same key returned by [keySelector] the last one gets added to the map.

```

public inline fun <K, M : MutableMap<in K, in Short>> ShortArray.associateByTo(destination: M, keySelector: (Short) -> K): M {
    for (element in this) {
        destination.put(keySelector(element), element)
    }
    return destination
}

```

Populates and returns the [destination] mutable map with key-value pairs, where key is provided by the [keySelector] function applied to each element of the given array and value is the element itself.

If any two elements would have the same key returned by [keySelector] the last one gets added to the map.

```

public inline fun <K, M : MutableMap<in K, in Int>> IntArray.associateByTo(destination: M, keySelector: (Int) -> K): M {
    for (element in this) {
        destination.put(keySelector(element), element)
    }
    return destination
}

```

Populates and returns the [destination] mutable map with key-value pairs, where key is provided by the [keySelector] function applied to each element of the given array and value is the element itself.

If any two elements would have the same key returned by [keySelector] the last one gets added to the map.

```

public inline fun <K, M : MutableMap<in K, in Long>> LongArray.associateByTo(destination: M, keySelector: (Long) -> K): M {
    for (element in this) {
        destination.put(keySelector(element), element)
    }
    return destination
}

```

Populates and returns the [destination] mutable map with key-value pairs, where key is provided by the [keySelector] function applied to each element of the given array and value is the element itself.

If any two elements would have the same key returned by [keySelector] the last one gets added to the map.

```

```

}
}

Returns a lazy [Iterable] that wraps each element of the original array into an [IndexedValue]
containing the index of that element and the element itself.
public fun CharArray.withIndex():
    Iterable<IndexedValue<Char>> {
        return IndexingIterable { iterator() }
    }

Returns a list containing
only distinct elements from the given array.
The elements in the resulting list are in the same order as they
were in the source array.
public fun <T> Array<out T>.distinct(): List<T> {
    return
    this.toMutableSet().toList()
}

Returns a list containing only distinct elements from the given array.
The elements in the resulting list are in the same order as they were in the source array.
public fun
ByteArray.distinct(): List<Byte> {
    return this.toMutableSet().toList()
}

Returns a list containing
only distinct elements from the given array.
The elements in the resulting list are in the same order as they
were in the source array.
public fun ShortArray.distinct(): List<Short> {
    return
    this.toMutableSet().toList()
}

Returns a list containing only distinct elements from the given array.
The elements in the resulting list are in the same order as they were in the source array.
public fun
IntArray.distinct(): List<Int> {
    return this.toMutableSet().toList()
}

Returns a list containing only
distinct elements from the given array.
The elements in the resulting list are in the same order as they were
in the source array.
public fun LongArray.distinct(): List<Long> {
    return
    this.toMutableSet().toList()
}

Returns a list containing only distinct elements from the given array.
The elements in the resulting list are in the same order as they were in the source array.
public fun
FloatArray.distinct(): List<Float> {
    return this.toMutableSet().toList()
}

Returns a list containing
only distinct elements from the given array.
The elements in the resulting list are in the same order as they
were in the source array.
public fun DoubleArray.distinct(): List<Double> {
    return
    this.toMutableSet().toList()
}

Returns a list containing only distinct elements from the given array.
The elements in the resulting list are in the same order as they were in the source array.
public fun
BooleanArray.distinct(): List<Boolean> {
    return this.toMutableSet().toList()
}

Returns a list
containing only distinct elements from the given array.
The elements in the resulting list are in the same
order as they were in the source array.
public fun CharArray.distinct(): List<Char> {
    return
    this.toMutableSet().toList()
}

Returns a list containing only elements from the given array having
distinct keys returned by the given [selector] function.
The elements in the resulting list are in the same
order as they were in the source array.
public inline fun <T, K> Array<out T>.distinctBy(selector: (T) -> K):
    List<T> {
        val set = HashSet<K>()
        val list = ArrayList<T>()
        for (e in this) {
            val key = selector(e)
            if (set.add(key))
                list.add(e)
        }
        return list
    }

Returns a list containing only elements
from the given array having distinct keys returned by the given [selector] function.
The elements in the
resulting list are in the same order as they were in the source array.
public inline fun <K>
ByteArray.distinctBy(selector: (Byte) -> K): List<Byte> {
    val set = HashSet<K>()
    val list =
    ArrayList<Byte>()
    for (e in this) {

```

there is no guarantee which one will be found.
 value is considered to be less than any non-null value.
 @return the index of the element, if it is contained in the list within the specified range;
 otherwise, the inverted insertion point $(-insertion\ point - 1)$.
 The insertion point is defined as the index at which the element should be inserted,
 so that the list (or the specified subrange of list) still remains sorted
 according to the specified [comparator].
 @sample

samples.collections.Collections.Lists.binarySearchWithComparator

```
public fun <T>
List<T>.binarySearch(element: T, comparator: Comparator<in T>, fromIndex: Int = 0, toIndex: Int = size): Int {
    rangeCheck(size, fromIndex, toIndex)
    var low = fromIndex
    var high = toIndex - 1
    while (low <= high) {
        val mid = (low + high).ushr(1) // safe from overflows
        val midVal = get(mid)
        val cmp = comparator.compare(midVal, element)
        if (cmp < 0) low = mid + 1
        else if (cmp > 0) high = mid - 1
        else return mid // key found
    }
    return -(low + 1) // key not found
}
```

Searches this list or its range for an element having the key returned by the specified [selector] function equal to the provided [key] value using the binary search algorithm.
 The list is expected to be sorted into ascending order according to the Comparable natural ordering of keys of its elements.
 otherwise the result is undefined.
 If the list contains multiple elements with the specified [key], there is no guarantee which one will be found.
 value is considered to be less than any non-null value.
 @return the index of the element with the specified [key], if it is contained in the list within the specified range;
 otherwise, the inverted insertion point $(-insertion\ point - 1)$.
 The insertion point is defined as the index at which the element should be inserted,
 so that the list (or the specified subrange of list) still remains sorted.
 @sample

samples.collections.Collections.Lists.binarySearchByKey

```
public inline fun <T, K : Comparable<K>> List<T>.binarySearchBy(
    key: K?, fromIndex: Int = 0, toIndex: Int = size,
    crossinline selector: (T) -> K?): Int =
    binarySearch(fromIndex, toIndex) {
```

```
compareValues(selector(it), key) } // do not introduce this overload --- too rare
public fun <T, K>
```

List<T>.binarySearchBy(key: K, comparator: Comparator<K>, fromIndex: Int = 0, toIndex: Int = size(), selector:

```
(T) -> K): Int =
    binarySearch(fromIndex, toIndex) { comparator.compare(selector(it), key)
```

```
} }
Searches this list or its range for an element for which [comparison] function returns zero using the binary search algorithm.  

The list is expected to be sorted into ascending order according to the provided [comparison],  

otherwise the result is undefined.  

If the list contains multiple elements for which [comparison] returns zero, there is no guarantee which one will be found.  

@param comparison function that compares an element of the list with the element being searched.  

@return the index of the found element, if it is contained in the list within the specified range;  

otherwise, the inverted insertion point  $(-insertion\ point - 1)$ .  

The insertion point is defined as the index at which the element should be inserted,  

so that the list (or the specified subrange of list) still remains sorted.  

@sample

```

samples.collections.Collections.Lists.binarySearchWithComparisonFunction

```
public fun <T>
List<T>.binarySearch(fromIndex: Int = 0, toIndex: Int = size, comparison: (T) -> Int): Int {
    rangeCheck(size, fromIndex, toIndex)
    var low = fromIndex
    var high = toIndex - 1
    while (low <= high) {
        val mid = (low + high).ushr(1) // safe from overflows
        val midVal = get(mid)
        val cmp = comparison(midVal)
        if (cmp < 0) low = mid + 1
        else if (cmp > 0) high = mid - 1
        else return mid // key found
    }
    return -(low + 1) // key not found
}
```

V> MutableMap<out K, V>.remove(key: K): V? =\r\n    @Suppress("UNCHECKED_CAST") (this as
MutableMap<K, V>).remove(key)\r\n\r\n**\r\n * Returns the key component of the map entry.\r\n * This
method allows to use destructuring declarations when working with maps, for example:\r\n * ```\r\n * for ((key,
value) in map) {\r\n *     // do something with the key and the value\r\n * }\r\n * ```\r\n
*\r\n@kotlin.internal.InlineOnly\r\npublic inline operator fun <K, V> Map.Entry<K, V>.component1(): K =
key\r\n\r\n**\r\n * Returns the value component of the map entry.\r\n * This method allows to use

```

```

destructuring declarations when working with maps, for example:
do something with the key and the value
operator fun <K, V> Map.Entry<K, V>.component2(): V = value
being first component and value being second.
Map.Entry<K, V>.toPair(): Pair<K, V> = Pair(key, value)
Returns the value for the given key, or the result of the [defaultValue] function if there was no entry for the given key.
@sample
samples.collections.Maps.Usage.getOrElse
operator fun <K, V> Map<K, V>.getOrElse(key: K, defaultValue: () -> V): V = get(key) ?: defaultValue
operator fun <K, V> Map<K, V>.getOrElseNullable(key: K, defaultValue: () -> V): V {
    val value = get(key)
    if (value == null && !containsKey(key))
        return defaultValue()
    } else {
        @Suppress("UNCHECKED_CAST")
        return value as V
    }
}
Returns the value for the given [key] or throws an exception if there is no such key in the map.
If the map was created by [withDefault], resorts to its `defaultValue` provider function instead of throwing an exception.
@throws NoSuchElementException when the map doesn't contain a value for the specified key and no implicit default value was provided for that map.
operator fun <K, V> Map<K, V>.getValue(key: K): V = getOrImplicitDefault(key)
Returns the value for the given key. If the key is not found in the map, calls the [defaultValue] function, puts its result into the map under the given key and returns it.
Note that the operation is not guaranteed to be atomic if the map is being modified concurrently.
@sample
samples.collections.Maps.Usage.getOrPut
operator fun <K, V> MutableMap<K, V>.getOrPut(key: K, defaultValue: () -> V): V {
    val value = get(key)
    return if (value == null) {
        val answer = defaultValue()
        put(key, answer)
        answer
    } else {
        value
    }
}
Returns an [Iterator] over the entries in the [Map].
@sample
samples.collections.Maps.Usage.forOverEntries
operator fun <K, V> Map<out K, V>.iterator(): Iterator<Map.Entry<K, V>> = entries.iterator()
Returns a [MutableIterator] over the mutable entries in the [MutableMap].
operator fun <K, V> MutableMap<K, V>.iterator(): MutableIterator<MutableMap.MutableEntry<K, V>> = entries.iterator()
Populates the given [destination] map with entries having the keys of this map and the values obtained by applying the [transform] function to each entry in this [Map].
operator fun <K, V, R, M : MutableMap<in K, in R>> Map<out K, V>.mapValuesTo(destination: M, transform: (Map.Entry<K, V>) -> R): M {
    return entries.associateByTo(destination, { it.key }, transform)
}
Populates the given [destination] map with entries having the keys obtained by applying the [transform] function to each entry in this [Map] and the values of this map.
In case if any two entries are mapped to the equal keys, the value of the latter one will overwrite the value associated with the former one.
operator fun <K, V, R, M : MutableMap<in R, in V>> Map<out K, V>.mapKeysTo(destination: M, transform: (Map.Entry<K, V>) -> R): M {
    return entries.associateByTo(destination, transform, { it.value })
}
Puts all the given [pairs] into this [MutableMap] with the first component in the pair being the key and the second the value.
operator fun <K, V> MutableMap<in K, in V>.putAll(pairs: Array<out Pair<K, V>>): Unit {
    for ((key, value) in pairs)
        put(key, value)
}
Puts all the elements of the given collection into this [MutableMap] with the first component in the pair being the key and the second the value.
operator fun <K, V> MutableMap<in K, in V>.putAll(pairs: Iterable<Pair<K, V>>): Unit {
    for ((key, value) in pairs)
        put(key, value)
}
Puts all the elements of the given sequence into this [MutableMap] with the first component in the pair being the key and the second the value.
operator fun <K, V> MutableMap<in K, in V>.putAll(pairs: Sequence<Pair<K, V>>): Unit {
    for ((key, value) in pairs)
        put(key, value)
}
Returns a new map with entries having the keys of this map and the values obtained by applying the [transform] function to each entry in this [Map].
The returned map preserves the entry iteration order of the original map.
@sample
samples.collections.Maps.Transformations.mapValues
operator fun <K, V, R> Map<out K, V>.mapValues(transform: (Map.Entry<K, V>) -> R): Map<K, R>

```

```

mutable map with key-value pairs from the given array of pairs.
public fun <K, V, M : MutableMap<in K, in V>> Array<out Pair<K, V>>.toMap(destination: M): M = destination.apply { putAll(this@toMap) }
Returns a new map containing all key-value pairs from the given sequence of pairs.
The returned map preserves the entry iteration order of the original sequence.
If any of two pairs would have the same key the last one gets added to the map.
public fun <K, V> Sequence<Pair<K, V>>.toMap(): Map<K, V> = toMap(LinkedHashMap<K, V>()).optimizeReadOnlyMap()
Populates and returns the [destination] mutable map with key-value pairs from the given sequence of pairs.
public fun <K, V, M : MutableMap<in K, in V>> Sequence<Pair<K, V>>.toMap(destination: M): M = destination.apply { putAll(this@toMap) }
Returns a new read-only map containing all key-value pairs from the original map.
The returned map preserves the entry iteration order of the original map.
@SinceKotlin("1.1")
public fun <K, V> Map<out K, V>.toMap(): Map<K, V> = when (size) { 0 -> emptyMap() 1 -> toSingletonMap() else -> toMutableMap() }
Returns a new mutable map containing all key-value pairs from the original map.
The returned map preserves the entry iteration order of the original map.
@SinceKotlin("1.1")
public fun <K, V> Map<out K, V>.toMutableMap(): MutableMap<K, V> = LinkedHashMap(this)
Populates and returns the [destination] mutable map with key-value pairs from the given map.
@SinceKotlin("1.1")
public fun <K, V, M : MutableMap<in K, in V>> Map<out K, V>.toMap(destination: M): M = destination.apply { putAll(this@toMap) }
Creates a new read-only map by replacing or adding an entry to this map from a given key-value [pair].
The returned map preserves the entry iteration order of the original map.
The [pair] is iterated in the end if it has a unique key.
public operator fun <K, V> Map<out K, V>.plus(pair: Pair<K, V>): Map<K, V> = if (this.isEmpty()) mapOf(pair) else LinkedHashMap(this).apply { put(pair.first, pair.second) }
Creates a new read-only map by replacing or adding entries to this map from a given collection of key-value [pairs].
The returned map preserves the entry iteration order of the original map.
Those [pairs] with unique keys are iterated in the end in the order of [pairs] collection.
public operator fun <K, V> Map<out K, V>.plus(pairs: Iterable<Pair<K, V>>): Map<K, V> = if (this.isEmpty()) pairs.toMap() else LinkedHashMap(this).apply { putAll(pairs) }
Creates a new read-only map by replacing or adding entries to this map from a given array of key-value [pairs].
The returned map preserves the entry iteration order of the original map.
Those [pairs] with unique keys are iterated in the end in the order of [pairs] array.
public operator fun <K, V> Map<out K, V>.plus(pairs: Array<out Pair<K, V>>): Map<K, V> = if (this.isEmpty()) pairs.toMap() else LinkedHashMap(this).apply { putAll(pairs) }
Creates a new read-only map by replacing or adding entries to this map from a given sequence of key-value [pairs].
The returned map preserves the entry iteration order of the original map.
Those [pairs] with unique keys are iterated in the end in the order of [pairs] sequence.
public operator fun <K, V> Map<out K, V>.plus(pairs: Sequence<Pair<K, V>>): Map<K, V> = LinkedHashMap(this).apply { putAll(pairs) }.optimizeReadOnlyMap()
Creates a new read-only map by replacing or adding entries to this map from another [map].
The returned map preserves the entry iteration order of the original map.
Those entries of another [map] that are missing in this map are iterated in the end in the order of that [map].
public operator fun <K, V> Map<out K, V>.plus(map: Map<out K, V>): Map<K, V> = LinkedHashMap(this).apply { putAll(map) }
Appends or replaces the given [pair] in this mutable map.
@kotlin.internal.InlineOnly
public inline operator fun <K, V> MutableMap<in K, in V>.plusAssign(pair: Pair<K, V>) { put(pair.first, pair.second) }
Appends or replaces all pairs from the given collection of [pairs] in this mutable map.
@kotlin.internal.InlineOnly
public inline operator fun <K, V> MutableMap<in K, in V>.plusAssign(pairs: Iterable<Pair<K, V>>) { putAll(pairs) }
Appends or replaces all pairs from the given array of [pairs] in this mutable map.
@kotlin.internal.InlineOnly
public inline operator fun <K, V> MutableMap<in K, in V>.plusAssign(pairs: Array<out Pair<K, V>>) { putAll(pairs) }
Appends or replaces all pairs from the given sequence of [pairs] in this mutable map.
@kotlin.internal.InlineOnly
public inline operator fun <K, V> MutableMap<in K, in V>.plusAssign(pairs: Sequence<Pair<K, V>>) { putAll(pairs) }

```

Appends or replaces all entries from the given [map] in this mutable map.

}

Returns `true` if the two specified arrays are *deeply* equal to one another,
*i.e. contain the same number of the same elements in the same order.*
If two corresponding elements are nested arrays, they are also compared
deeply.
If any of arrays contains itself on any nesting level the behavior is undefined.
The elements of other types are compared for equality with the [equals][Any.equals] function.
For floating point numbers it means that `NaN` is equal to itself and `-0.0` is not equal to `0.0`.

@SinceKotlin("1.1")
@library("arrayDeepEquals")
public actual infix fun <T> Array<out T>.contentDeepEquals(other: Array<out T>): Boolean {
    definedExternally
}

Returns a hash code based on the contents of this array as if it is [List].
Nested arrays are treated as lists too.
If any of arrays contains itself on any nesting level the behavior is undefined.

@SinceKotlin("1.1")
@library("arrayDeepHashCode")
public actual fun <T> Array<out T>.contentDeepHashCode(): Int {
    definedExternally
}

Returns a string representation of the contents of this array as if it is a [List].
Nested arrays are treated as lists too.
If any of arrays contains itself on any nesting level that reference
is rendered as `[...]` to prevent recursion.
@sample
samples.collections.Arrays.ContentOperations.contentDeepToString

@SinceKotlin("1.1")
@library("arrayDeepToString")
public actual fun <T> Array<out T>.contentDeepToString(): String {
    definedExternally
}

Returns `true` if the two specified arrays are *structurally* equal to one another,
*i.e. contain the same number of the same elements in the same order.*
The elements are compared for equality with the [equals][Any.equals] function.
For floating point numbers it means that `NaN` is equal to itself and `-0.0` is not equal to `0.0`.

@SinceKotlin("1.1")
@library("arrayEquals")
public actual infix fun <T> Array<out T>.contentEquals(other: Array<out T>): Boolean {

```

information see the documentation for [scope functions](https://kotlinlang.org/docs/reference/scope-functions.html#run).

```

@kotlin.internal.InlineOnly
public inline fun <T, R> T.run(block: T.() -> R): R {
    contract {
        callsInPlace(block, InvocationKind.EXACTLY_ONCE)
    }
    return block()
}

```

Calls the specified function [block] with the given [receiver] as its receiver and returns its result.

For detailed usage information see the documentation for [scope functions](https://kotlinlang.org/docs/reference/scope-functions.html#with).

```

@kotlin.internal.InlineOnly
public inline fun <T, R> with(receiver: T, block: T.() -> R): R {
    contract {
        callsInPlace(block, InvocationKind.EXACTLY_ONCE)
    }
    return receiver.block()
}

```

Calls the specified function [block] with `this` value as its receiver and returns `this` value.

For detailed usage information see the documentation for [scope functions](https://kotlinlang.org/docs/reference/scope-functions.html#apply).

```

@kotlin.internal.InlineOnly
public inline fun <T> T.apply(block: T.() -> Unit): T {
    contract {
        callsInPlace(block, InvocationKind.EXACTLY_ONCE)
    }
    block()
    return this
}

```

Calls the specified function [block] with `this` value as its argument and returns `this` value.

For detailed usage information see the documentation for [scope functions](https://kotlinlang.org/docs/reference/scope-functions.html#also).

```

@kotlin.internal.InlineOnly
@SinceKotlin("1.1")
public inline fun <T> T.also(block: (T) -> Unit): T {
    contract {
        callsInPlace(block, InvocationKind.EXACTLY_ONCE)
    }
    block(this)
    return this
}

```

Calls the specified function [block] with `this` value as its argument and returns its result.

For detailed usage information see the documentation for [scope functions](https://kotlinlang.org/docs/reference/scope-functions.html#let).

```

@kotlin.internal.InlineOnly
public inline fun <T, R> T.let(block: (T) -> R): R {
    contract {
        callsInPlace(block, InvocationKind.EXACTLY_ONCE)
    }
    return block(this)
}

```

Returns `this` value if it satisfies the given [predicate] or `null`, if it doesn't.

```

@kotlin.internal.InlineOnly
@SinceKotlin("1.1")
public inline fun <T> T.takeIf(predicate: (T) -> Boolean): T? {
    contract {
        callsInPlace(predicate, InvocationKind.EXACTLY_ONCE)
    }
    return if (predicate(this)) this else null
}

```

Returns `this` value if it does not satisfy the given [predicate] or `null`, if it does.

```

@kotlin.internal.InlineOnly
@SinceKotlin("1.1")
public inline fun <T> T.takeUnless(predicate: (T) -> Boolean): T? {
    contract {
        callsInPlace(predicate, InvocationKind.EXACTLY_ONCE)
    }

samples.collections.Collections.Transformations.map
public inline fun <T, R> Iterable<T>.map(transform: (T) -> R): List<R> {
    return mapTo(ArrayList<R>(collectionSizeOrDefault(10)), transform)
}

```

Returns a list containing the results of applying the given [transform] function to each element and its index in the original collection.

```

@param [transform] function that takes the index of an element and the element itself
and returns the result of the transform applied to the element.
public inline fun <T, R> Iterable<T>.mapIndexed(transform: (index: Int, T) -> R): List<R> {
    return mapIndexedTo(ArrayList<R>(collectionSizeOrDefault(10)), transform)
}

```

Returns a list containing only the non-null results of applying the given [transform] function to each element and its index in the original collection.

```

@param [transform] function that takes the index of an element and the element itself
and returns the result of the transform applied to the element.
public inline fun <T, R : Any> Iterable<T>.mapIndexedNotNull(transform: (index: Int, T) -> R?): List<R> {
    return mapIndexedNotNullTo(ArrayList<R>(), transform)
}

```

Applies the given [transform] function to each element and its index in the original collection and appends only the non-null results to the given [destination].

```

@param [transform] function that takes the index of an element and the element itself
and returns the result of the transform applied to the element.
public inline fun <T, R : Any, C : MutableCollection<in R>> Iterable<T>.mapIndexedNotNullTo(destination: C, transform: (index: Int, T) -> R?): C {
    for (index, element) in this.withIndex() {
        destination.add(transform(index, element)?.let { destination.add(it) })
    }
    return destination
}

```

Applies the given [transform] function to each element and its index in the original collection and appends the results to the given [destination].

```

@param [transform] function that takes the index of an element and the element itself
and returns the result of the transform applied to the element.
public inline fun <T, R, C : MutableCollection<in R>> Iterable<T>.mapIndexedTo(destination: C, transform: (index: Int, T) -> R): C {
    var index = 0
    for (item in this) {
        destination.add(transform(checkIndexOverflow(index++), item))
    }
    return destination
}

```

Returns a list containing only the non-null results of applying the given [transform] function to each element in the original collection.

```

public inline fun <T, R : Any> Iterable<T>.mapNotNull(transform: (T) -> R?): List<R> {
    return mapNotNullTo(ArrayList<R>(), transform)
}

```

Applies the given [transform] function to each element in the original collection and appends only the non-null results to the given [destination].

```

public inline fun <T, R : Any, C : MutableCollection<in R>> Iterable<T>.mapNotNullTo(destination: C, transform: (T) -> R?): C {
    for (element) in this {
        destination.add(transform(element)?.let { destination.add(it) })
    }
    return destination
}

```

Applies the given [transform] function to each element of the original collection and appends the results to the given [destination].

```

public inline fun <T, R, C : MutableCollection<in R>> Iterable<T>.mapTo(destination: C, transform: (T) -> R): C {
    for (item in this) {
        destination.add(transform(item))
    }
    return destination
}

```

Returns a lazy [Iterable] that wraps each element of the original collection into an [IndexedValue] containing the index of that element and the element itself.

```

public fun <T> Iterable<T>.withIndex(): Iterable<IndexedValue<T>> {
    return IndexingIterable { iterator() }
}

```

Returns a list containing only distinct elements from the given collection.

The elements in the resulting list

are in the same order as they were in the source collection.

```

public fun <T> Iterable<T>.distinct(): List<T> {
    return this.toMutableSet().toList()
}

```

* Returns a list containing only elements from the given collection * having distinct keys returned by the given [selector] function. * The elements in the resulting list are in the same order as they were in the source collection.

```

public inline fun <T, K> Iterable<T>.distinctBy(selector: (T) -> K): List<T> {
    val set = HashSet<K>()
    val list = ArrayList<T>()

```

the results of applying the given [transform] function to each element and its index in the original sequence.

@param [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

The operation is `_intermediate_` and `_stateless_`.

```
public fun <T, R> Sequence<T>.mapIndexed(transform: (index: Int, T) -> R): Sequence<R> {
    return TransformingIndexedSequence(this, transform)
}
```

Returns a sequence containing only the non-null results of applying the given [transform] function to each element and its index in the original sequence.

@param [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

The operation is `_intermediate_` and `_stateless_`.

```
public fun <T, R : Any> Sequence<T>.mapIndexedNotNull(transform: (index: Int, T) -> R?): Sequence<R> {
    return TransformingIndexedSequence(this, transform).filterNotNull()
}
```

Applies the given [transform] function to each element and its index in the original sequence and appends only the non-null results to the given [destination].

@param [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

The operation is `_terminal_`.

```
public inline fun <T, R : Any, C : MutableCollection<in R>> Sequence<T>.mapIndexedNotNullTo(destination: C, transform: (index: Int, T) -> R?): C {
    forEachIndexed { index, element -> transform(index, element)?.let { destination.add(it) } }
    return destination
}
```

Applies the given [transform] function to each element and its index in the original sequence and appends the results to the given [destination].

@param [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

The operation is `_terminal_`.

```
public inline fun <T, R : Any, C : MutableCollection<in R>> Sequence<T>.mapIndexedTo(destination: C, transform: (index: Int, T) -> R): C {
    var index = 0
    for (item in this)
        destination.add(transform(checkIndexOverflow(index++), item))
    return destination
}
```

Returns a sequence containing only the non-null results of applying the given [transform] function to each element in the original sequence.

The operation is `_intermediate_` and `_stateless_`.

```
public fun <T, R : Any> Sequence<T>.mapNotNull(transform: (T) -> R?): Sequence<R> {
    return TransformingSequence(this, transform).filterNotNull()
}
```

Applies the given [transform] function to each element in the original sequence and appends only the non-null results to the given [destination].

The operation is `_terminal_`.

```
public inline fun <T, R : Any, C : MutableCollection<in R>> Sequence<T>.mapNotNullTo(destination: C, transform: (T) -> R?): C {
    forEach { element -> transform(element)?.let { destination.add(it) } }
    return destination
}
```

Applies the given [transform] function to each element of the original sequence and appends the results to the given [destination].

The operation is `_terminal_`.

```
public inline fun <T, R, C : MutableCollection<in R>> Sequence<T>.mapTo(destination: C, transform: (T) -> R): C {
    for (item in this)
        destination.add(transform(item))
    return destination
}
```

Returns a sequence that wraps each element of the original sequence into an [IndexedValue] containing the index of that element and the element itself.

The operation is `_intermediate_` and `_stateless_`.

```
public fun <T> Sequence<T>.withIndex(): Sequence<IndexedValue<T>> {
    return IndexingSequence(this)
}
```

Returns a sequence containing only distinct elements from the given sequence.

The elements in the resulting sequence are in the same order as they were in the source sequence.

The operation is `_intermediate_` and `_stateful_`.

```
public fun <T> Sequence<T>.distinct(): Sequence<T> {
    return this.distinctBy { it }
}
```

Returns a sequence containing only elements from the given sequence having distinct keys returned by the given [selector] function.

The elements in the resulting sequence are in the same order as they were in the source sequence.

The operation is `_intermediate_` and `_stateful_`.

```
public fun <T, K> Sequence<T>.distinctBy(selector: (T) -> K): Sequence<T> {
    return DistinctSequence(this, selector)
}
```

Returns a mutable set containing all distinct elements from the given sequence.

The returned set preserves the element iteration order of the original sequence.

The operation is `_terminal_`.

```
public fun <T> Sequence<T>.toMutableSet(): MutableSet<T> {
    val set = LinkedHashSet<T>()
    for (item in this)
        set.add(item)
    return set
}
```

Returns `true` if all elements match the given [predicate].

The operation is `_terminal_`.

```
public inline fun <T> Sequence<T>.all(predicate: (T) -> Boolean): Boolean {
    for (element in this) if (!predicate(element)) return
}
```

```

Returns the sum of all values produced by [selector] function applied to each element in
the sequence.\n * \n * The operation is _terminal_.\n */\n\npublic inline fun <T> Sequence<T>.sumBy(selector: (T) ->

```

```

Int): Int {
    var sum: Int = 0
    for (element in this) {
        sum += selector(element)
    }
    return sum
}

Returns the sum of all values produced by [selector] function applied to each element in the sequence.

The operation is _terminal_.

public inline fun <T> Sequence<T>.sumByDouble(selector: (T) -> Double): Double {
    var sum: Double = 0.0
    for (element in this) {
        sum += selector(element)
    }
    return sum
}

Returns an original collection containing all the non-`null` elements, throwing an [IllegalArgumentException] if there are any `null` elements.

The operation is _intermediate_ and _stateless_.

public fun <T : Any> Sequence<T?>.requireNonNulls(): Sequence<T> {
    return map { it ?: throw IllegalArgumentException("`null element found in $this.`") }
}

Splits this sequence into a sequence of lists each not exceeding the given [size].

The last list in the resulting sequence may have less elements than the given [size].

@param size the number of elements to take in each list, must be positive and can be greater than the number of elements in this sequence.

The operation is _intermediate_ and _stateful_.

@sample samples.collections.Collections.Transformations.chunked

@SinceKotlin("1.2")
public fun <T> Sequence<T>.chunked(size: Int): Sequence<List<T>> {
    return windowed(size, size, partialWindows = true)
}

Splits this sequence into several lists each not exceeding the given [size] and applies the given [transform] function to an each.

@return sequence of results of the [transform] applied to an each list.

Note that the list passed to the [transform] function is ephemeral and is valid only inside that function.

You should not store it or allow it to escape in some way, unless you made a snapshot of it.

The last list may have less elements than the given [size].

@param size the number of elements to take in each list, must be positive and can be greater than the number of elements in this sequence.

The operation is _intermediate_ and _stateful_.

@sample samples.text.Strings.chunkedTransform

@SinceKotlin("1.2")
public fun <T, R> Sequence<T>.chunked(size: Int, transform: (List<T>) -> R): Sequence<R> {
    return windowed(size, size, partialWindows = true, transform = transform)
}

Returns a sequence containing all elements of the original sequence without the first occurrence of the given [element].

The operation is _intermediate_ and _stateless_.

public operator fun <T> Sequence<T>.minus(element: T): Sequence<T> {
    return object: Sequence<T> {
        override fun iterator(): Iterator<T> {
            var removed = false
            return this@minus.filter { if (!removed && it == element) { removed = true; false } else true }.iterator()
        }
    }
}

Returns a sequence containing all elements of original sequence except the elements contained in the given [elements] array.

Note that the source sequence and the array being subtracted are iterated only when an `iterator` is requested from the resulting sequence. Changing any of them between successive calls to `iterator` may affect the result.

The [elements] array may be converted to a [HashSet] to speed up the operation, thus the elements are required to have a correct and stable implementation of `hashCode()` that doesn't change between successive invocations.

The operation is _intermediate_ and _stateful_.

public operator fun <T> Sequence<T>.minus(elements: Array<out T>): Sequence<T> {
    if (elements.isEmpty()) return this
    return object: Sequence<T> {
        override fun iterator(): Iterator<T> {
            val other = elements.toHashSet()
            return this@minus.filterNot { it in other }.iterator()
        }
    }
}

Returns a sequence containing all elements of original sequence except the elements contained in the given [elements] collection.

Note that the source sequence and the collection being subtracted are iterated only when an `iterator` is requested from the resulting sequence. Changing any of them between successive calls to `iterator` may affect the result.

The [elements] collection may be converted to a [HashSet] to speed up the operation, thus the elements are required to have a correct and stable implementation of `hashCode()` that doesn't change between successive invocations.

The operation is _intermediate_ and _stateful_.

public operator fun <T> Sequence<T>.minus(elements: Iterable<T>): Sequence<T> {
    return object: Sequence<T> {
        override fun iterator(): Iterator<T> {
            val other = elements.convertToSetForSetOperation()
            if (other.isEmpty()) return this@minus.iterator()
            else return this@minus.filterNot { it in other }.iterator()
        }
    }
}

Returns a sequence containing all elements of original sequence except the elements contained in the given [elements] sequence.

Note that the source sequence and the sequence being subtracted are iterated only when an `iterator` is requested from the resulting sequence. Changing any of them between successive calls to `iterator` may affect the result.

        list.add(valueTransform(element))
    }
    return destination
}

Creates a [Grouping] source from a char sequence to be used later with one of group-and-fold operations using the specified [keySelector] function to extract a key from each character.

@sample samples.collections.Grouping.groupingByEachCount

@SinceKotlin("1.1")
public inline fun <K>
CharSequence.groupingBy(crossinline keySelector: (Char) -> K): Grouping<Char, K> {
    return object : Grouping<Char, K> {
        override fun sourceIterator(): Iterator<Char> = this@groupingBy.iterator()
        override fun keyOf(element: Char): K = keySelector(element)
    }
}

Returns a list containing the results of applying the given [transform] function to each character in the original char sequence.

@sample samples.text.Strings.map

public inline fun <R>
CharSequence.map(transform: (Char) -> R): List<R> {
    return mapTo(ArrayList<R>(length), transform)
}

Returns a list containing the results of applying the given [transform] function to each character and its index in the original char sequence.

@param [transform] function that takes the index of a character and the character itself and returns the result of the transform applied to the character.

public inline fun <R>
CharSequence.mapIndexed(transform: (index: Int, Char) -> R): List<R> {
    return mapIndexedTo(ArrayList<R>(length), transform)
}

Returns a list containing only the non-null results of applying the given [transform] function to each character and its index in the original char sequence.

@param [transform] function that takes the index of a character and the character itself and returns the result of the transform applied to the character.

public inline fun <R : Any>
CharSequence.mapIndexedNotNull(transform: (index: Int, Char) -> R?): List<R> {
    return mapIndexedNotNullTo(ArrayList<R>(), transform)
}

Applies the given [transform] function to each character and its index in the original char sequence and appends only the non-null results to the given [destination].

@param [transform] function that takes the index of a character and the character itself and returns the result of the transform applied to the character.

public inline fun <R : Any, C : MutableCollection<in R>>
CharSequence.mapIndexedNotNullTo(destination: C, transform: (index: Int, Char) -> R?): C {
    forEachIndexed { index, element -> transform(index, element)?.let { destination.add(it) } }
    return destination
}

Applies the given [transform] function to each character and its index in the original char sequence and appends the results to the given [destination].

@param [transform] function that takes the index of a character and the character itself and returns the result of the transform applied to the character.

public inline fun <R, C : MutableCollection<in R>>
CharSequence.mapIndexedTo(destination: C, transform: (index: Int, Char) -> R): C {

 public interface KType : KAnnotatedElement {
/**
 * The declaration of the classifier used in this type.
 For example, in the type `List<String>` the classifier would be the [KClass] instance for [List].
 * Returns `null` if this type is not denotable in Kotlin, for example if it is an intersection type.
 @SinceKotlin("1.1")
 public val classifier: KClassifier?
/**
 * Type arguments passed for the parameters of the classifier in this type.
 For example, in the type `Array<out Number>` the only type argument is `out Number`.
 * In case this type is based on an inner class, the returned list contains the type arguments provided for the innermost class first, then its outer class, and so on.
 For example, in the type `Outer<A, B>.Inner<C, D>` the returned list is `[C, D, A, B]`.
 @SinceKotlin("1.1")
 public val arguments: List<KTypeProjection>
/**
 * `true` if this type was marked nullable in the source code.
 For Kotlin types, it means that `null` value is allowed to be represented by this type.
 In practice it means that the type was declared with a question mark at the end.
 For non-Kotlin types, it means the type or the symbol which was declared with this type is annotated with a runtime-retained nullability annotation such as [javax.annotation.Nullable].
 * Note that even if [isMarkedNullable] is false, values of the type can still be `null`.
 This may happen if it is a type of the type parameter with a nullable upper bound:
 fun <T> foo(t: T) { // isMarkedNullable == false for t's type, but t can be null here when T = `Any?` }
 *
 @SinceKotlin("1.1")
 public val isMarkedNullable: Boolean
}
/**
 * Represents a type projection. Type projection is usually the argument to another type in a type usage.
 For example, in the type `Array<out Number>`, `out Number` is the covariant projection of the type represented by the class `Number`.
 * Type projection is either the star projection, or an entity consisting of a specific type plus optional variance.
 See the [Kotlin language documentation](https://kotlinlang.org/docs/reference/generics.html#type-projections) for more information.
 @SinceKotlin("1.1")
 public data class KTypeProjection constructor(
/**
 * The use-site variance specified in the projection, or `null` if this is a star projection.
 public val variance: KVariance?,
/**
 * The type specified in the projection, or `null` if this is a star projection.
 public val type: KType?,
 ) {
 public companion object {
/**
 * Star projection,

```

denoted by the `*` character. For example, in the type `KClass<*>`, `*` is the star projection. See the [Kotlin language documentation](https://kotlinlang.org/docs/reference/generics.html#star-projections) for more information.

```
public val STAR: KTypeProjection = KTypeProjection(null, null)
```

Creates an invariant projection of a given type. Invariant projection is just the type itself, without any use-site variance modifiers applied to it. For example, in the type `Set<String>`, `String` is an invariant projection of the type represented by the class `String`.

```
public fun invariant(type: KType): KTypeProjection = KTypeProjection(KVariance.INVARIANT, type)
```

Creates a contravariant projection of a given type, denoted by the `in` modifier applied to a type. For example, in the type `MutableList<in Number>`, `in Number` is a contravariant projection of the type of class `Number`.

```
public fun contravariant(type: KType): KTypeProjection = KTypeProjection(KVariance.IN, type)
```

Creates a covariant projection of a given type, denoted by the `out` modifier applied to a type. For example, in the type `Array<out Number>`, `out Number` is a covariant projection of the type of class `Number`.

```
public fun covariant(type: KType): KTypeProjection = KTypeProjection(KVariance.OUT, type)
```

`kotlin.reflect` Represents variance applied to a type parameter on the declaration site (*declaration-site variance*), or to a type in a projection (*use-site variance*). See the [Kotlin language documentation](https://kotlinlang.org/docs/reference/generics.html#variance) for more information. @see [KTypeParameter.variance] @see [KTypeProjection]

Since Kotlin(1.1) enum class

```
KVariance {
    /** The affected type parameter or type is *invariant*, which means it has no variance applied to it.
     * INVARIANT,
     * The affected type parameter or type is
     *contravariant*. Denoted by the `in` modifier in the source code.
     * IN,
     * The affected
     type parameter or type is *covariant*. Denoted by the `out` modifier in the source code.
     * OUT,
    }
```

Visibility is an aspect of a Kotlin declaration regulating where that declaration is accessible in the source code. Visibility can be changed with one of the following modifiers: `public`, `protected`, `internal`, `private`. Note that some Java visibilities such as package-private and protected (which also gives access to items from the same package) cannot be represented in Kotlin, so there's no [KVisibility] value corresponding to them. See the [Kotlin language documentation](https://kotlinlang.org/docs/reference/visibility-modifiers.html) for more information.

Since Kotlin(1.1) enum class

```
KVisibility {
    /** Visibility of declarations marked with the
     `public` modifier, or with no modifier at all.
     * PUBLIC,
     * Visibility of declarations
     marked with the `protected` modifier.
     * PROTECTED,
     * Visibility of declarations
     marked with the `internal` modifier.
     * INTERNAL,
     * Visibility of declarations
     marked with the `private` modifier.
     * PRIVATE,
    }
```

kotlin.coroutines
nimport kotlin.coroutines.intrinsics.*
nimport kotlin.internal.InlineOnly
n

Interface representing a continuation after a suspension point that returns a value of type `T`.

@SinceKotlin("1.3")
public interface Continuation<in T> {
    /**
     * The context of the coroutine that corresponds to this continuation.
     */
    public val context: CoroutineContext

    /**
     * Resumes the execution of the corresponding coroutine passing a successful or failed [result] as the
     * return value of the last suspension point.
     */
    public fun resumeWith(result: Result<T>): T
}

Classes and interfaces marked with this annotation are restricted when used as receivers for extension
`suspend` functions. These `suspend` extensions can only invoke other member or extension `suspend` functions on this particular
receiver and are restricted from calling arbitrary suspension functions.

@SinceKotlin("1.3")
@Target(AnnotationTarget.CLASS)
@Retention(AnnotationRetention.BINARY)
public annotation class RestrictsSuspension

Resumes the execution of the corresponding coroutine passing [value] as the return value of the last suspension point.

@SinceKotlin("1.3")
@InlineOnly
public inline fun <T> Continuation<T>.resume(value: T): Unit =
    resumeWith(Result.success(value))

Resumes the execution of the corresponding coroutine so that the [exception] is re-thrown right after the
last suspension point.

@SinceKotlin("1.3")
@InlineOnly
public inline fun <T> Continuation<T>.resumeWithException(exception: Throwable): Unit =
    resumeWith(Result.failure(exception))

Creates a [Continuation] instance with the given [context] and implementation of [resumeWith] method.

@SinceKotlin("1.3")
@InlineOnly
public inline fun <T> Continuation(
    context: CoroutineContext,
    crossinline resumeWith: (Result<T>) -> Unit): Continuation<T> =
    object : Continuation<T> {
        override val context: CoroutineContext = context
        override fun resumeWith(result: Result<T>) = resumeWith(result)
    }

Creates a coroutine without a receiver and with result type [T].

This function creates a new, fresh instance of suspendable computation every time it is invoked.

To start executing the created coroutine, invoke `resume(Unit)` on the returned [Continuation] instance.

The [completion] continuation is invoked when the coroutine completes with a result or an exception.

Subsequent invocation of any resume

```

function on the resulting continuation will produce an [IllegalStateException].

```

* @SinceKotlin("1.3") @Suppress("UNCHECKED_CAST") public fun <T> (suspend () ->
T).createCoroutine(completion: Continuation<T>): Continuation<Unit> =
SafeContinuation(createCoroutineUnintercepted(completion).intercepted(),
COROUTINE_SUSPENDED)

```

* Creates a coroutine with receiver type [R] and result type [T]. This function creates a new, fresh instance of suspendable computation every time it is invoked. To start executing the created coroutine, invoke `resume(Unit)` on the returned [Continuation] instance. The [completion] continuation is invoked when the coroutine completes with a result or an exception. Subsequent invocation of any resume function on the resulting continuation will produce an [IllegalStateException].

```

* @SinceKotlin("1.3") @Suppress("UNCHECKED_CAST") public fun <R, T> (suspend R.() ->
T).createCoroutine(receiver: R, completion: Continuation<T>): Continuation<Unit> =
SafeContinuation(createCoroutineUnintercepted(receiver, completion).intercepted(),
COROUTINE_SUSPENDED)

```

* Starts a coroutine without a receiver and with result type [T]. This function creates and starts a new, fresh instance of suspendable computation every time it is invoked. The [completion] continuation is invoked when the coroutine completes with a result or an exception.

```

* @SinceKotlin("1.3") @Suppress("UNCHECKED_CAST") public fun <T> (suspend () ->
T).startCoroutine(completion: Continuation<T>) {
createCoroutineUnintercepted(completion).intercepted().resume(Unit)
}

```

* Starts a coroutine with receiver type [R] and result type [T]. This function creates and starts a new, fresh instance of suspendable computation every time it is invoked. The [completion] continuation is invoked when the coroutine completes with a result or an exception.

```

* @SinceKotlin("1.3") @Suppress("UNCHECKED_CAST") public fun <R, T> (suspend R.() -> T).startCoroutine(receiver: R, completion: Continuation<T>) {
createCoroutineUnintercepted(receiver, completion).intercepted().resume(Unit)
}

```

* Obtains the current continuation instance inside suspend functions and suspends the currently running coroutine. In this function both [Continuation.resume] and [Continuation.resumeWithException] can be used either synchronously in the same stack-frame where the suspension function is run or asynchronously later in the same thread or from a different thread of execution. Subsequent invocation of any resume function will produce an [IllegalStateException].

```

* @SinceKotlin("1.3") @InlineOnly public suspend inline fun
<T> suspendCoroutine(crossinline block: (Continuation<T>) -> Unit): T =
suspendCoroutineUninterceptedOrReturn { c: Continuation<T> ->
val safe =
SafeContinuation(c.intercepted())
block(safe)
safe.getOrThrow()
}

```

* Returns the context of the current coroutine.

```

* @SinceKotlin("1.3") @Suppress("WRONG_MODIFIER_TARGET") @InlineOnly public suspend
inline val coroutineContext: CoroutineContext get() {
throw NotImplementedError("Implemented as
intrinsic()")
}

```

```

package kotlin.coroutines.intrinsics
import kotlin.coroutines.*
import kotlin.internal.InlineOnly

```

* Starts an unintercepted coroutine without a receiver and with result type [T] and executes it until its first suspension. Returns the result of the coroutine or throws its exception if it does not suspend or [COROUTINE_SUSPENDED] if it suspends. In the latter case, the [completion] continuation is invoked when the coroutine completes with a result or an exception. The coroutine is started directly in the invoker's thread without going through the [ContinuationInterceptor] that might be present in the completion's [CoroutineContext]. It is the invoker's responsibility to ensure that a proper invocation context is established. This function is designed to be used from inside of [suspendCoroutineUninterceptedOrReturn] to resume the execution of the suspended coroutine using a reference to the suspending function.

```

* @SinceKotlin("1.3") @InlineOnly public actual inline fun
<T> (suspend () -> T).startCoroutineUninterceptedOrReturn(completion: Continuation<T>): Any? =
this.asDynamic()(completion, false)

```

* Starts an unintercepted coroutine with receiver type [R] and

result type [T] and executes it until its first suspension. Returns the result of the coroutine or throws its exception if it does not suspend or [COROUTINE_SUSPENDED] if it suspends. In the latter case, the [completion] continuation is invoked when the coroutine completes with a result or an exception. The coroutine is started directly in the invoker's thread without going through the [ContinuationInterceptor] that might be present in the completion's [CoroutineContext]. It is the invoker's responsibility to ensure that a proper invocation context is established. This function is designed to be used from inside of [suspendCoroutineUninterceptedOrReturn] to resume the execution of the suspended coroutine using a reference to the suspending function.

```

@SinceKotlin("1.3")
@InlineOnly
public actual inline fun <R, T>
(suspend R.() -> T).startCoroutineUninterceptedOrReturn(
    receiver: R,
    completion: Continuation<T>): Any? = this.asDynamic()(receiver, completion, false)

```

Creates unintercepted coroutine without receiver and with result type [T]. This function creates a new, fresh instance of suspendable computation every time it is invoked. To start executing the created coroutine, invoke `resume(Unit)` on the returned [Continuation] instance. The [completion] continuation is invoked when coroutine completes with result or exception. This function returns unintercepted continuation. Invocation of `resume(Unit)` starts coroutine immediately in the invoker's call stack without going through the [ContinuationInterceptor] that might be present in the completion's [CoroutineContext]. It is the invoker's responsibility to ensure that a proper invocation context is established. Note that [completion] of this function may get invoked in an arbitrary context. [Continuation.intercepted] can be used to acquire the intercepted continuation. Invocation of `resume(Unit)` on intercepted continuation guarantees that execution of both the coroutine and [completion] happens in the invocation context established by [ContinuationInterceptor]. Repeated invocation of any resume function on the resulting continuation corrupts the state machine of the coroutine and may result in arbitrary behaviour or exception.

```

@SinceKotlin("1.3")
public actual fun <T>
(suspend () -> T).createCoroutineUnintercepted(
    completion: Continuation<T>): Continuation<Unit> =
    // Kotlin/JS suspend lambdas have an extra parameter `suspended`
    if (this.asDynamic().length == 2)
    {
        // When `suspended` is true the continuation is created, but not executed
        this.asDynamic()(completion, true)
    } else {
        createCoroutineFromSuspendFunction(completion) {
            this.asDynamic()(completion)
        }
    }

```

Creates unintercepted coroutine with receiver type [R] and result type [T]. This function creates a new, fresh instance of suspendable computation every time it is invoked. To start executing the created coroutine, invoke `resume(Unit)` on the returned [Continuation] instance. The [completion] continuation is invoked when coroutine completes with result or exception. This function returns unintercepted continuation. Invocation of `resume(Unit)` starts coroutine immediately in the invoker's call stack without going through the [ContinuationInterceptor] that might be present in the completion's [CoroutineContext]. It is the invoker's responsibility to ensure that a proper invocation context is established. Note that [completion] of this function may get invoked in an arbitrary context. [Continuation.intercepted] can be used to acquire the intercepted continuation. Invocation of `resume(Unit)` on intercepted continuation guarantees that execution of both the coroutine and [completion] happens in the invocation context established by [ContinuationInterceptor]. Repeated invocation of any resume function on the resulting continuation corrupts the state machine of the coroutine and may result in arbitrary behaviour or exception.

```

@SinceKotlin("1.3")
public actual fun <R, T>
(suspend R.() -> T).createCoroutineUnintercepted(
    receiver: R,
    completion: Continuation<T>): Continuation<Unit> =
    // Kotlin/JS suspend lambdas have an extra parameter `suspended`
    if (this.asDynamic().length == 3)
    {
        // When `suspended` is true the continuation is created, but not executed
        this.asDynamic()(receiver, completion, true)
    } else {
        createCoroutineFromSuspendFunction(completion) {
            this.asDynamic()(receiver, completion)
        }
    }

```

Intercepts this continuation with [ContinuationInterceptor]. This function shall be used on the immediate result of [createCoroutineUnintercepted] or [suspendCoroutineUninterceptedOrReturn], in which case it checks for [ContinuationInterceptor] in the continuation's [context][Continuation.context], invokes [ContinuationInterceptor.interceptContinuation], caches and returns the result. If this function is

```

invoked on other [Continuation] instances it returns `this` continuation unchanged.\r\n

marker\r\n\r\n\r\n/*\r\n * Gives a declaration (a function, a property or a class) specific name in JavaScript.\r\n *
\r\n * This may be useful in the following cases:\r\n * * There are two functions for which the compiler gives same
name in JavaScript, you can\r\n * mark one with `@JsName(...)` to prevent the compiler from reporting error.\r\n *
\r\n * * You are writing a JavaScript library in Kotlin. The compiler produces mangled names\r\n * for functions
with parameters, which is unnatural for usual JavaScript developer.\r\n * You can put `@JsName(...)` on
functions you want to be available from JavaScript.\r\n * * For some reason you want to rename declaration, e.g.
there's common term in JavaScript\r\n * for a concept provided by the declaration, which is uncommon in
Kotlin.\r\n * * Example:\r\n * * ```` kotlin\r\n * * class Person(val name: String) {\r\n * * fun hello() {\r\n * *
println("Hello $name!")\r\n * * }\r\n * * * @JsName("helloWithGreeting")\r\n * * fun hello(greeting:
String) {\r\n * * println("$greeting $name!")\r\n * * }\r\n * * }\r\n * * ````\r\n * * @property name the name
which compiler uses both for declaration itself and for all references to the declaration.\r\n * It's required to
denote a valid JavaScript identifier.\r\n * * \r\n * * @Retention(AnnotationRetention.BINARY)\r\n * * @Target(CLASS,
FUNCTION, PROPERTY, CONSTRUCTOR, PROPERTY_GETTER, PROPERTY_SETTER)\r\n * * public actual
annotation class JsName(actual val name: String)\r\n * * \r\n * * Denotes an `external` declaration that must be
imported from native JavaScript library.\r\n * * \r\n * * The compiler produces the code relevant for the target module
system, for example, in case of CommonJS,\r\n * * it will import the declaration via the `require(...)` function.\r\n *
\r\n * * The annotation can be used on top-level external declarations (classes, properties, functions) and files.\r\n *
\r\n * In case of file (which can't be `external`) the following rule applies: all the declarations in\r\n * the file must be
`external`. By applying `@JsModule(...)` on a file you tell the compiler to import a JavaScript object\r\n * that
contain all the declarations from the file.\r\n * * Example:\r\n * * * ```` kotlin\r\n * * * @JsModule("jquery")\r\n * *
\r\n * * external abstract class JQuery() {\r\n * * // some declarations here\r\n * * }\r\n * * * @JsModule("jquery")\r\n * *
\r\n * * external fun JQuery(element: Element): JQuery\r\n * * * ````\r\n * * * @property import name of a module to import
declaration from.\r\n * * It is not interpreted by the Kotlin compiler, it's passed as is directly to the target
module system.\r\n * * @see JsNonModule\r\n * * \r\n * * \r\n * * @Retention(AnnotationRetention.BINARY)\r\n * * @Target(CLASS, PROPERTY, FUNCTION, FILE)\r\n * * public
annotation class JsModule(val import: String)\r\n * * \r\n * * Denotes an `external` declaration that can be used
without module system.\r\n * * By default, an `external` declaration is available regardless your target module
system.\r\n * * However, by applying [JsModule] annotation you can make a declaration unavailable to *plain*
module system.\r\n * * Some JavaScript libraries are distributed both as a standalone downloadable piece of
JavaScript and as a module available\r\n * as an npm package.\r\n * * To tell the Kotlin compiler to accept both cases,
you can augment [JsModule] with the `@JsNonModule` annotation.\r\n * * For example:\r\n * * * ```` kotlin\r\n * * *
@JsModule("jquery")\r\n * * * @JsNonModule\r\n * * * @JsName("$")\r\n * * * external abstract class JQuery() {\r\n * *
\r\n * * // some declarations here\r\n * * }\r\n * * * @JsModule("jquery")\r\n * * * @JsNonModule\r\n * * * @JsName("$")\r\n

```

```

* external fun JQuery(element: Element): JQuery\r\n * ```\r\n * \r\n * @see JsModule\r\n
*\r\n@Retention(AnnotationRetention.BINARY)\r\n@Target(CLASS, PROPERTY, FUNCTION, FILE)\r\npublic
annotation class JsNonModule\r\n\r\n**\r\n * Adds prefix to `external` declarations in a source file.\r\n * \r\n *
JavaScript does not have concept of packages (namespaces). They are usually emulated by nested objects.\r\n * The
compiler turns references to `external` declarations either to plain unprefixed names (in case of *plain* modules)\r\n
* or to plain imports.\r\n * However, if a JavaScript library provides its declarations in packages, you won't be
satisfied with this.\r\n * You can tell the compiler to generate additional prefix before references to `external`
declarations using the `@JsQualifier(...)`\r\n * annotation.\r\n * \r\n * Note that a file marked with the
`@JsQualifier(...)` annotation can't contain non-`external` declarations.\r\n * \r\n * Example:\r\n * \r\n * ```\r\n *
@file:JsQualifier("my.jsPackageName")\r\n * package some.kotlinPackage\r\n * \r\n * external fun foo(x: Int)\r\n
*\r\n * external fun bar(): String\r\n * ```\r\n * \r\n * @property value the qualifier to add to the declarations in the
generated code.\r\n *      It must be a sequence of valid JavaScript identifiers separated by the `.` character.\r\n *
Examples of valid qualifiers are: `foo`, `bar.Baz`, `_.$.f`.\r\n * \r\n * @see JsModule\r\n
*\r\n@Retention(AnnotationRetention.BINARY)\r\n@Target(AnnotationTarget.FILE)\r\npublic annotation class
JsQualifier(val value: String)\r\n\r\n**\r\n * Exports top-level declaration.\r\n * \r\n * Used in future IR-based
backend.\r\n * Has no effect in current JS backend.\r\n

*\r\n\r\n@file:kotlin.jvm.JvmName("GroupingKt")\r\n@file:kotlin.jvm.JvmMultifileClass\r\n\r\npackage
kotlin.collections\r\n\r\n**\r\n * Represents a source of elements with a [keyOf] function, which can be applied to
each element to get its key.\r\n * A [Grouping] structure serves as an intermediate step in group-and-fold
operations:\r\n * they group elements by their keys and then fold each group with some aggregating operation.\r\n
*\r\n * It is created by attaching `keySelector: (T) -> K` function to a source of elements.\r\n * To get an instance of
[Grouping] use one of `groupingBy` extension functions:\r\n * - [Iterable.groupingBy]\r\n * -
[Sequence.groupingBy]\r\n * - [Array.groupingBy]\r\n * - [CharSequence.groupingBy]\r\n * For the list of
group-and-fold operations available, see the [extension functions](#extension-functions) for `Grouping`.\r\n
*\r\n@SinceKotlin("1.1")\r\npublic interface Grouping<T, out K> {\r\n    /** Returns an [Iterator] over the
elements of the source of this grouping. */\r\n    fun sourceIterator(): Iterator<T>\r\n    /** Extracts the key of an
[element]. */\r\n    fun keyOf(element: T): K\r\n}\r\n\r\n**\r\n * Groups elements from the [Grouping] source by
key and applies [operation] to the elements of each group sequentially,\r\n * passing the previously accumulated
value and the current element as arguments, and stores the results in a new map.\r\n * The key for each element
is provided by the [Grouping.keyOf] function.\r\n * @param operation function is invoked on each element
with the following parameters:\r\n * - `key`: the key of the group this element belongs to;\r\n * - `accumulator`: the
current value of the accumulator of the group, can be `null` if it's the first `element` encountered in the group;\r\n
* - `element`: the element from the source being aggregated;\r\n * - `first`: indicates whether it's the first `element`
encountered in the group.\r\n * @return a [Map] associating the key of each group with the result of
aggregation of the group elements.\r\n * @sample samples.collections.Grouping.aggregateByRadix\r\n
*\r\n@SinceKotlin("1.1")\r\npublic inline fun <T, K, R> Grouping<T, K>.aggregate(\r\n    operation: (key: K,

package kotlin.js
An interface for indexing access to a
collection of key-value pairs, where type of key is [String] and type of value is [Any?][Any].
public
external interface Json {
    Calls to the function will be translated to indexing operation (square
brackets) on the receiver with [propertyName] as the argument.
    E.g. for next code:
    kotlin
    fun test(j: Json, p: String) = j["prop"] + j.get(p)
    will be generated:
    js
    function test(j, p) {
        return j["prop"] + j[p];
    }
    operator fun
get(propertyName: String): Any?
    Calls of the function will be translated to an assignment of
[value] to the receiver indexed (with square brackets/index operation) with [propertyName].
    E.g. for
the following code:
    kotlin
    fun test(j: Json, p: String, newValue: Any) {
        j["prop"] =
1
        j.set(p, newValue)
    }
    will be generated:
    js
    function
test(j, p, newValue) {
        j["prop"] = 1;
        j[p] = newValue;
    }
    operator fun
set(propertyName: String, value: Any?): Unit
Returns a simple JavaScript
object (as [Json]) using provided key-value pairs as names and values of its properties.
public fun
json(vararg pairs: Pair<String, Any?>): Json {
    val res: dynamic = js("{}")
    for ((name, value) in pairs)
        res[name] = value
    return res
}
Adds key-value pairs from [other] to
[this].
Returns the original receiver.
public fun Json.add(other: Json): Json {
    val keys:
Array<String> = js("Object").keys(other)
    for (key in keys)
        if
(other.asDynamic().hasOwnProperty(key))
            this[key] = other[key];
    return
this
}
Exposes the JavaScript [JSON object](https://developer.mozilla.org/en-
US/docs/Web/JavaScript/Reference/Global_Objects/JSON) to Kotlin.
@Suppress("NOT_DOCUMENTED")
public external object JSON {

===== Double Math =====
Computes
the sine of the angle [x] given in radians.
Special cases:
- sin(NaN|+Inf|-Inf) is NaN
@SinceKotlin("1.2")
@InlineOnly
public actual inline fun sin(x: Double): Double =
nativeMath.sin(x)
Computes the cosine of the angle [x] given in radians.
Special cases:
-
cos(NaN|+Inf|-Inf) is NaN
@SinceKotlin("1.2")
@InlineOnly
public actual inline fun cos(x:
Double): Double = nativeMath.cos(x)
Computes the tangent of the angle [x] given in radians.
Special cases:
-
tan(NaN|+Inf|-Inf) is NaN
@SinceKotlin("1.2")
@InlineOnly
public

```

actual inline fun tan(x: Double): Double = nativeMath.tan(x) * Computes the arc sine of the value [x]; the returned value is an angle in the range from $-\pi/2$ to $\pi/2$ radians. Special cases: $\text{asin}(x)$ is NaN, when $\text{abs}(x) > 1$ or x is NaN

actual inline fun asin(x: Double): Double = nativeMath.asin(x) * Computes the arc cosine of the value [x]; the returned value is an angle in the range from 0.0 to π radians. Special cases: $\text{acos}(x)$ is NaN, when $\text{abs}(x) > 1$ or x is NaN

actual inline fun acos(x: Double): Double = nativeMath.acos(x) * Computes the arc tangent of the value [x]; the returned value is an angle in the range from $-\pi/2$ to $\pi/2$ radians. Special cases: $\text{atan}(\text{NaN})$ is NaN

actual inline fun atan(x: Double): Double = nativeMath.atan(x) * Returns the angle θ of the polar coordinates (r, θ) that correspond to the rectangular coordinates (x, y) by computing the arc tangent of the value y / x ; the returned value is an angle in the range from $-\pi$ to π radians. Special cases: $\text{atan2}(0.0, 0.0)$ is 0.0 ; $\text{atan2}(0.0, x)$ is 0.0 for $x > 0$ and π for $x < 0$; $\text{atan2}(-0.0, x)$ is -0.0 for $x > 0$ and $-\pi$ for $x < 0$; $\text{atan2}(y, +\text{Inf})$ is 0.0 for $0 < y < +\text{Inf}$ and -0.0 for $-\text{Inf} < y < 0$; $\text{atan2}(y, -\text{Inf})$ is π for $0 < y < +\text{Inf}$ and $-\pi$ for $-\text{Inf} < y < 0$; $\text{atan2}(y, 0.0)$ is $\pi/2$ for $y > 0$ and $-\pi/2$ for $y < 0$; $\text{atan2}(+\text{Inf}, x)$ is $\pi/2$ for finite x ; $\text{atan2}(-\text{Inf}, x)$ is $-\pi/2$ for finite x ; $\text{atan2}(\text{NaN}, x)$ and $\text{atan2}(y, \text{NaN})$ is NaN

actual inline fun atan2(y: Double, x: Double): Double = nativeMath.atan2(y, x) * Computes the hyperbolic sine of the value [x]. Special cases: $\sinh(\text{NaN})$ is NaN; $\sinh(+\text{Inf})$ is $+\text{Inf}$; $\sinh(-\text{Inf})$ is $-\text{Inf}$

actual inline fun sinh(x: Double): Double = nativeMath.sinh(x) * Computes the hyperbolic cosine of the value [x]. Special cases: $\cosh(\text{NaN})$ is NaN; $\cosh(+\text{Inf}-\text{Inf})$ is $+\text{Inf}$

actual inline fun cosh(x: Double): Double = nativeMath.cosh(x) * Computes the hyperbolic tangent of the value [x]. Special cases: $\tanh(\text{NaN})$ is NaN; $\tanh(+\text{Inf})$ is 1.0 ; $\tanh(-\text{Inf})$ is -1.0

actual inline fun tanh(x: Double): Double = nativeMath.tanh(x) * Computes the inverse hyperbolic sine of the value [x]. The returned value is y such that $\sinh(y) == x$. Special cases: $\text{asinh}(\text{NaN})$ is NaN; $\text{asinh}(+\text{Inf})$ is $+\text{Inf}$; $\text{asinh}(-\text{Inf})$ is $-\text{Inf}$

actual inline fun asinh(x: Double): Double = nativeMath.asinh(x) * Computes the inverse hyperbolic cosine of the value [x]. The returned value is positive y such that $\cosh(y) == x$. Special cases: $\text{acosh}(\text{NaN})$ is NaN; $\text{acosh}(x)$ is NaN when $x < 1$; $\text{acosh}(+\text{Inf})$ is $+\text{Inf}$

actual inline fun acosh(x: Double): Double = nativeMath.acosh(x) * Computes the inverse hyperbolic tangent of the value [x]. The returned value is y such that $\tanh(y) == x$. Special cases: $\text{atanh}(\text{NaN})$ is NaN; $\text{atanh}(x)$ is NaN when $x > 1$ or $x < -1$; $\text{atanh}(1.0)$ is $+\text{Inf}$; $\text{atanh}(-1.0)$ is $-\text{Inf}$

actual inline fun atanh(x: Double): Double = nativeMath.atanh(x) * Computes $\sqrt{x^2 + y^2}$ without intermediate overflow or underflow. Special cases: returns $+\text{Inf}$ if any of arguments is infinite; returns NaN if any of arguments is NaN and the other is not infinite

actual inline fun hypot(x: Double, y: Double): Double = nativeMath.hypot(x, y) * Computes the positive square root of the value [x]. Special cases: \sqrt{x} is NaN when $x < 0$ or x is NaN

actual inline fun sqrt(x: Double): Double = nativeMath.sqrt(x) * Computes Euler's number e raised to the power of the value [x]. Special cases: $\exp(\text{NaN})$ is NaN; $\exp(+\text{Inf})$ is $+\text{Inf}$; $\exp(-\text{Inf})$ is 0.0

actual inline fun exp(x: Double): Double = nativeMath.exp(x) * Computes $\exp(x) - 1$. This function can be implemented to produce more precise result for [x] near zero. Special cases: $\text{expm1}(\text{NaN})$ is NaN; $\text{expm1}(+\text{Inf})$ is $+\text{Inf}$; $\text{expm1}(-\text{Inf})$ is -1.0 @see [exp] function.

`@SinceKotlin("1.2")`
`public actual inline fun expm1(x: Double): Double = nativeMath.expm1(x)`
 Computes the logarithm of the value [x] to the given [base].
 Special cases:
 - `log(x, b)` is `NaN` if either `x` or `b` are `NaN`
 - `log(x, b)` is `NaN` when `x < 0` or `b <= 0` or `b == 1.0`
 - `log(+Inf, +Inf)` is `NaN`
 - `log(+Inf, b)` is `+Inf` for `b > 1` and `-Inf` for `b < 1`
 - `log(0.0, b)` is `-Inf` for `b > 1` and `+Inf` for `b > 1`
 See also logarithm functions for common fixed bases: `[ln]`, `[log10]` and `[log2]`.
`@SinceKotlin("1.2")`
`public actual fun log(x: Double, base: Double): Double {`
 if (base <= 0.0 || base == 1.0) return Double.NaN
 return nativeMath.log(x) / nativeMath.log(base)
`}`
 Computes the natural logarithm (base `E`) of the value [x].
 Special cases:
 - `ln(NaN)` is `NaN`
 - `ln(x)` is `NaN` when `x < 0.0`
 - `ln(+Inf)` is `+Inf`
 - `ln(0.0)` is `-Inf`
`@SinceKotlin("1.2")`
`public actual inline fun ln(x: Double): Double = nativeMath.log(x)`
 Computes the common logarithm (base 10) of the value [x].
 @see `[ln]` function for special cases.
`@SinceKotlin("1.2")`
`public actual inline fun log10(x: Double): Double = nativeMath.log10(x)`
 Computes the binary logarithm (base 2) of the value [x].
 @see `[ln]` function for special cases.
`@SinceKotlin("1.2")`
`public actual inline fun log2(x: Double): Double = nativeMath.log2(x)`
 Computes `ln(x + 1)`.
 This function can be implemented to produce more precise result for [x] near zero.
 Special cases:
 - `ln1p(NaN)` is `NaN`
 - `ln1p(x)` is `NaN` where `x < -1.0`
 - `ln1p(-1.0)` is `-Inf`
 - `ln1p(+Inf)` is `+Inf`
 @see `[ln]` function
 @see `[expm1]` function
`@SinceKotlin("1.2")`
`public actual inline fun ln1p(x: Double): Double = nativeMath.log1p(x)`
 Rounds the given value [x] to an integer towards positive infinity.
 @return the smallest double value that is greater than or equal to the given value [x] and is a mathematical integer.
 Special cases:
 - `ceil(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.
`@SinceKotlin("1.2")`
`public actual inline fun ceil(x: Double): Double = nativeMath.ceil(x).unsafeCast<Double>() // TODO: Remove unsafe cast after removing public js.math`
 Rounds the given value [x] to an integer towards negative infinity.
 @return the largest double value that is smaller than or equal to the given value [x] and is a mathematical integer.
 Special cases:
 - `floor(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.
`@SinceKotlin("1.2")`
`public actual inline fun floor(x: Double): Double = nativeMath.floor(x).unsafeCast<Double>()`
 Rounds the given value [x] to an integer towards zero.
 @return the value [x] having its fractional part truncated.
 Special cases:
 - `truncate(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.
`@SinceKotlin("1.2")`
`public actual inline fun truncate(x: Double): Double = nativeMath.trunc(x)`
 Rounds the given value [x] towards the closest integer with ties rounded towards even integer.
 Special cases:
 - `round(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.
`@SinceKotlin("1.2")`
`public actual fun round(x: Double): Double {`
 if (x % 0.5 != 0.0) {
 return nativeMath.round(x).unsafeCast<Double>()
 }
 val floor = floor(x)
 return if (floor % 2 == 0.0) floor else ceil(x)
`}`
 Returns the absolute value of the given value [x].
 Special cases:
 - `abs(NaN)` is `NaN`
 @see `absoluteValue` extension property for `[Double]`
`@SinceKotlin("1.2")`
`public actual inline fun abs(x: Double): Double = nativeMath.abs(x)`
 Returns the sign of the given value [x]:
 - `-1.0` if the value is negative,
 - zero if the value is zero,
 - `1.0` if the value is positive
 Special case:
 - `sign(NaN)` is `NaN`
`@SinceKotlin("1.2")`
`public actual inline fun sign(x: Double): Double = nativeMath.sign(x)`
 Returns the smaller of two values.
 If either value is `NaN`, then the result is `NaN`.
`@SinceKotlin("1.2")`
`public actual inline fun min(a: Double, b: Double): Double = nativeMath.min(a, b)`
 Returns the greater of two values.
 If either value is `NaN`, then the result is `NaN`.
`@SinceKotlin("1.2")`
`public actual inline fun max(a: Double, b: Double): Double = nativeMath.max(a, b)`
 extensions
 Raises this value to the power [x].
 Special cases:
 - `b.pow(0.0)` is `1.0`
 - `b.pow(1.0) == b`
 - `b.pow(NaN)` is `NaN`
 - `NaN.pow(x)` is `NaN` for `x != 0.0`
 - `b.pow(Inf)` is `NaN` for `abs(b) == 1.0`
 -

```

```

`nativeMath.sin(x.toDouble()).toFloat()` Computes the cosine of the angle [x] given in radians.
 Special cases: `-cos(NaN|+Inf|-Inf)` is `NaN`
 actual inline fun `cos(x: Float): Float = nativeMath.cos(x.toDouble()).toFloat()` Computes the tangent of the angle [x] given in radians.
 Special cases: `-tan(NaN|+Inf|-Inf)` is `NaN`
 actual inline fun `tan(x: Float): Float = nativeMath.tan(x.toDouble()).toFloat()` Computes the arc sine of the value [x]; the returned value is an angle in the range from $-\pi/2$ to $\pi/2$ radians.
 Special cases: `-asin(x)` is `NaN`, when `abs(x) > 1` or x is `NaN`
 actual inline fun `asin(x: Float): Float = nativeMath.asin(x.toDouble()).toFloat()` Computes the arc cosine of the value [x]; the returned value is an angle in the range from 0.0 to π radians.
 Special cases: `-acos(x)` is `NaN`, when `abs(x) > 1` or x is `NaN`
 actual inline fun `acos(x: Float): Float = nativeMath.acos(x.toDouble()).toFloat()` Computes the arc tangent of the value [x]; the returned value is an angle in the range from $-\pi/2$ to $\pi/2$ radians.
 Special cases: `-atan(NaN)` is `NaN`
 actual inline fun `atan(x: Float): Float = nativeMath.atan(x.toDouble()).toFloat()` Returns the angle `theta` of the polar coordinates `(r, theta)` that correspond to the rectangular coordinates `(x, y)` by computing the arc tangent of the value `y / x`; the returned value is an angle in the range from $-\pi$ to π radians.
 Special cases: `-atan2(0.0, 0.0)` is `0.0`
`-atan2(0.0, x)` is `0.0` for `x > 0` and `PI` for `x < 0`
`-atan2(-0.0, x)` is `-0.0` for `x > 0` and `-PI` for `x < 0`
`-atan2(y, +Inf)` is `0.0` for `0 < y < +Inf` and `-0.0` for `-Inf < y < 0`
`-atan2(y, -Inf)` is `PI` for `0 < y < +Inf` and `-PI` for `-Inf < y < 0`
`-atan2(y, 0.0)` is `PI/2` for `y > 0` and `-PI/2` for `y < 0`
`-atan2(+Inf, x)` is `PI/2` for finite `x`
`-atan2(-Inf, x)` is `-PI/2` for finite `x`
`-atan2(NaN, x)` and `atan2(y, NaN)` is `NaN`
 actual inline fun `atan2(y: Float, x: Float): Float = nativeMath.atan2(y.toDouble(), x.toDouble()).toFloat()` Computes the hyperbolic sine of the value [x].
 Special cases: `-sinh(NaN)` is `NaN`
`-sinh(+Inf)` is `+Inf`
`-sinh(-Inf)` is `-Inf`
 actual inline fun `sinh(x: Float): Float = nativeMath.sinh(x.toDouble()).toFloat()` Computes the hyperbolic cosine of the value [x].
 Special cases: `-cosh(NaN)` is `NaN`
`-cosh(+Inf|-Inf)` is `+Inf`
 actual inline fun `cosh(x: Float): Float = nativeMath.cosh(x.toDouble()).toFloat()` Computes the hyperbolic tangent of the value [x].
 Special cases: `-tanh(NaN)` is `NaN`
`-tanh(+Inf)` is `1.0`
`-tanh(-Inf)` is `-1.0`
 actual inline fun `tanh(x: Float): Float = nativeMath.tanh(x.toDouble()).toFloat()` Computes the inverse hyperbolic sine of the value [x].
 The returned value is `y` such that `sinh(y) == x`.
 Special cases: `-asinh(NaN)` is `NaN`
`-asinh(+Inf)` is `+Inf`
`-asinh(-Inf)` is `-Inf`
 actual inline fun `asinh(x: Float): Float = nativeMath.asinh(x.toDouble()).toFloat()` Computes the inverse hyperbolic cosine of the value [x].
 The returned value is positive `y` such that `cosh(y) == x`.
 Special cases: `-acosh(NaN)` is `NaN`
`-acosh(x)` is `NaN` when `x < 1`
`-acosh(+Inf)` is `+Inf`
 actual inline fun `acosh(x: Float): Float = nativeMath.acosh(x.toDouble()).toFloat()` Computes the inverse hyperbolic tangent of the value [x].
 The returned value is `y` such that `tanh(y) == x`.
 Special cases: `-atanh(NaN)` is `NaN`
`-atanh(x)` is `NaN` when `x > 1` or `x < -1`
`-atanh(1.0)` is `+Inf`
`-atanh(-1.0)` is `-Inf`
 actual inline fun `atanh(x: Float): Float = nativeMath.atanh(x.toDouble()).toFloat()` Computes `sqrt(x^2 + y^2)` without intermediate overflow or underflow.
 Special cases: returns `+Inf` if any of arguments is infinite
 returns `NaN` if any of arguments is `NaN` and the other is not infinite
 actual inline fun `hypot(x: Float, y: Float): Float = nativeMath.hypot(x.toDouble(), y.toDouble()).toFloat()` Computes the positive square root of the value [x].
 Special

cases:
`sqrt(x)` is `NaN` when `x < 0` or `x` is `NaN`

`SinceKotlin("1.2")@InlineOnly@npublic actual inline fun sqrt(x: Float): Float = nativeMath.sqrt(x.toDouble()).toFloat()`
 Computes Euler's number `e` raised to the power of the value `[x]`

Special cases:
`exp(NaN)` is `NaN`
`exp(+Inf)` is `+Inf`
`exp(-Inf)` is `0.0`

`SinceKotlin("1.2")@InlineOnly@npublic actual inline fun exp(x: Float): Float = nativeMath.exp(x.toDouble()).toFloat()`
 Computes `exp(x) - 1`

This function can be implemented to produce more precise result for `[x]` near zero

Special cases:
`expm1(NaN)` is `NaN`
`expm1(+Inf)` is `+Inf`
`expm1(-Inf)` is `-1.0`
 @see `[exp]` function

`SinceKotlin("1.2")@InlineOnly@npublic actual inline fun expm1(x: Float): Float = nativeMath.expm1(x.toDouble()).toFloat()`
 Computes the logarithm of the value `[x]` to the given `[base]`

Special cases:
`log(x, b)` is `NaN` if either `x` or `b` are `NaN`
`log(x, b)` is `NaN` when `x < 0` or `b <= 0` or `b == 1.0`
`log(+Inf, +Inf)` is `NaN`
`log(+Inf, b)` is `+Inf` for `b > 1` and `-Inf` for `b < 1`
`log(0.0, b)` is `-Inf` for `b > 1` and `+Inf` for `b > 1`
 See also logarithm functions for common fixed bases: `[ln]`, `[log10]` and `[log2]`

`SinceKotlin("1.2")@InlineOnly@npublic actual inline fun log(x: Float, base: Float): Float = log(x.toDouble(), base.toDouble()).toFloat()`
 Computes the natural logarithm (base `E`) of the value `[x]`

Special cases:
`ln(NaN)` is `NaN`
`ln(x)` is `NaN` when `x < 0.0`
`ln(+Inf)` is `+Inf`
`ln(0.0)` is `-Inf`

`SinceKotlin("1.2")@InlineOnly@npublic actual inline fun ln(x: Float): Float = nativeMath.log(x.toDouble()).toFloat()`
 Computes the common logarithm (base 10) of the value `[x]`
 @see `[ln]` function for special cases

`SinceKotlin("1.2")@InlineOnly@npublic actual inline fun log10(x: Float): Float = nativeMath.log10(x.toDouble()).toFloat()`
 Computes the binary logarithm (base 2) of the value `[x]`
 @see `[ln]` function for special cases

`SinceKotlin("1.2")@InlineOnly@npublic actual inline fun log2(x: Float): Float = nativeMath.log2(x.toDouble()).toFloat()`
 Computes `ln(a + 1)`

This function can be implemented to produce more precise result for `[x]` near zero

Special cases:
`ln1p(NaN)` is `NaN`
`ln1p(x)` is `NaN` where `x < -1.0`
`ln1p(-1.0)` is `-Inf`
`ln1p(+Inf)` is `+Inf`
 @see `[ln]` function
 @see `[expm1]` function

`SinceKotlin("1.2")@InlineOnly@npublic actual inline fun ln1p(x: Float): Float = nativeMath.log1p(x.toDouble()).toFloat()`
 Rounds the given value `[x]` to an integer towards positive infinity
 @return the smallest `Float` value that is greater than or equal to the given value `[x]` and is a mathematical integer

Special cases:
`ceil(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer

`SinceKotlin("1.2")@InlineOnly@npublic actual inline fun ceil(x: Float): Float = nativeMath.ceil(x.toDouble()).toFloat()`
 Rounds the given value `[x]` to an integer towards negative infinity
 @return the largest `Float` value that is smaller than or equal to the given value `[x]` and is a mathematical integer

Special cases:
`floor(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer

`SinceKotlin("1.2")@InlineOnly@npublic actual inline fun floor(x: Float): Float = nativeMath.floor(x.toDouble()).toFloat()`
 Rounds the given value `[x]` to an integer towards zero
 @return the value `[x]` having its fractional part truncated

Special cases:
`truncate(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer

`SinceKotlin("1.2")@InlineOnly@npublic actual inline fun truncate(x: Float): Float = truncate(x.toDouble()).toFloat()`
 Rounds the given value `[x]` towards the closest integer with ties rounded towards even integer

Special cases:
`round(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer

`SinceKotlin("1.2")@InlineOnly@npublic actual inline fun round(x: Float): Float = round(x.toDouble()).toFloat()`
 Returns the absolute value of the given value `[x]`

Special cases:
`abs(NaN)` is `NaN`
 @see `absoluteValue` extension property for `[Float]`

`SinceKotlin("1.2")@InlineOnly@npublic actual inline fun abs(x: Float): Float = nativeMath.abs(x.toDouble()).toFloat()`
 Returns the sign of the given value `[x]`
`-1.0` if the value is negative,
`0.0` if the value is zero,
`1.0` if the value is positive

Special case:

```

- `sign(NaN)` is `NaN`
@SinceKotlin("1.2")
@InlineOnly
public actual inline fun sign(x: Float):
Float = nativeMath.sign(x.toDouble()).toFloat()
Returns the smaller of two values.
If either value is `NaN`, then the result is `NaN`.
@SinceKotlin("1.2")
@InlineOnly
public actual
inline fun min(a: Float, b: Float): Float = nativeMath.min(a, b)
Returns the greater of two values.
If either value is `NaN`, then the result is `NaN`.
@SinceKotlin("1.2")
@InlineOnly
public
actual inline fun max(a: Float, b: Float): Float = nativeMath.max(a, b)
// extensions
Raises
this value to the power [x].
Special cases:
- `b.pow(0.0)` is `1.0`
- `b.pow(1.0) == b`
- `b.pow(NaN)` is `NaN`
- `NaN.pow(x)` is `NaN` for `x != 0.0`
- `b.pow(Inf)` is `NaN` for `abs(b) ==
1.0`
- `b.pow(x)` is `NaN` for `b < 0` and `x` is finite and not an integer
@SinceKotlin("1.2")
@InlineOnly
public actual inline fun Float.pow(x: Float): Float =
nativeMath.pow(this.toDouble(), x.toDouble()).toFloat()
Raises this value to the integer power
[n].
See the other overload of [pow] for details.
@SinceKotlin("1.2")
@InlineOnly
public
actual inline fun Float.pow(n: Int): Float = nativeMath.pow(this.toDouble(), n.toDouble()).toFloat()
Returns the absolute value of this value.
Special cases:
- `NaN.absoluteValue` is `NaN`
@see abs function
@SinceKotlin("1.2")
@InlineOnly
public actual inline val Float.absoluteValue:
Float get() = nativeMath.abs(this.toDouble()).toFloat()
Returns the sign of this value:
- `-1.0`
if the value is negative,
- zero if the value is zero,
- `1.0` if the value is positive
Special
case:
- `NaN.sign` is `NaN`
@SinceKotlin("1.2")
@InlineOnly
public actual inline val
Float.sign: Float get() = nativeMath.sign(this.toDouble()).toFloat()
Returns this value with the sign
bit same as of the [sign] value.
If [sign] is `NaN` the sign of the result is undefined.
@SinceKotlin("1.2")
@InlineOnly
public actual inline fun Float.withSign(sign: Float): Float =
this.toDouble().withSign(sign.toDouble()).toFloat()
Returns this value with the sign bit same as of
the [sign] value.
@SinceKotlin("1.2")
@InlineOnly
public actual inline fun Float.withSign(sign:
Int): Float = this.toDouble().withSign(sign.toDouble()).toFloat()
Rounds this [Float] value to the
nearest integer and converts the result to [Int].
Ties are rounded towards positive infinity.
Special
cases:
- `x.roundToInt() == Int.MAX_VALUE` when `x > Int.MAX_VALUE`
- `x.roundToInt() ==
Int.MIN_VALUE` when `x < Int.MIN_VALUE`
@throws IllegalArgumentException when this value is
`NaN`
@SinceKotlin("1.2")
@InlineOnly
public actual inline fun Float.roundToInt(): Int =
toDouble().roundToInt()
Rounds this [Float] value to the nearest integer and converts the result to
[Long].
Ties are rounded towards positive infinity.
Special cases:
- `x.roundToLong() ==
Long.MAX_VALUE` when `x > Long.MAX_VALUE`
- `x.roundToLong() == Long.MIN_VALUE` when
`x < Long.MIN_VALUE`
@throws IllegalArgumentException when this value is `NaN`
@SinceKotlin("1.2")
@InlineOnly
public actual inline fun Float.roundToLong(): Long =
toDouble().roundToLong()
// endregion
region ===== Integer Math
=====
Returns the absolute value of the given
value [n].
Special cases:
- `abs(Int.MIN_VALUE)` is `Int.MIN_VALUE` due to an overflow
@see absoluteValue extension property for [Int]
// TODO: remove manual 'or' when KT-19290 is
fixed
@SinceKotlin("1.2")
public actual fun abs(n: Int): Int = if (n < 0) (-n or 0) else n
Returns the smaller of two values.
@SinceKotlin("1.2")
@InlineOnly
public actual inline fun min(a:
Int, b: Int): Int = nativeMath.min(a, b)
Returns the greater of two values.
@SinceKotlin("1.2")
@InlineOnly
public actual inline fun max(a: Int, b: Int): Int = nativeMath.max(a,
b)
Returns the absolute value of this value.
Special cases:
-
`Int.MIN_VALUE.absoluteValue` is `Int.MIN_VALUE` due to an overflow
@see abs function
@SinceKotlin("1.2")
@InlineOnly
public actual inline val Int.absoluteValue: Int get() =
abs(this)
Returns the sign of this value:
- `-1` if the value is negative,
- `0` if the value is
zero,
- `1` if the value is positive
@SinceKotlin("1.2")
public actual val Int.sign: Int get() = when
{
this < 0 -> -1
this > 0 -> 1
else -> 0
}
Returns the absolute value of the
given value [n].
Special cases:
- `abs(Long.MIN_VALUE)` is `Long.MIN_VALUE` due to an

```

```

overflow
 * @see absoluteValue extension property for [Long]
 * @SinceKotlin("1.2")

 * Rotates the binary representation of this [Int] number left by the specified [bitCount] number of bits.
 * The most significant bits pushed out from the left side reenter the number as the least significant bits on the right side.
 * Rotating the number left by a negative bit count is the same as rotating it right by the negated bit count:
 * `number.rotateLeft(-n) == number.rotateRight(n)`
 * Rotating by a multiple of [Int.SIZE_BITS] (32) returns

```

```

the same number, or more generally
`number.rotateLeft(n) == number.rotateLeft(n % 32)`

@SinceKotlin("1.3")@ExperimentalStdlibApi public actual fun Int.rotateLeft(bitCount: Int): Int =
    shl(bitCount) or ushr(Int.SIZE_BITS - bitCount)

Rotates the binary representation of this [Int]
number right by the specified [bitCount] number of bits.
The least significant bits pushed out from the right
side reenter the number as the most significant bits on the left side.
Rotating the number right by a
negative bit count is the same as rotating it left by the negated bit count.
`number.rotateRight(-n) ==
number.rotateLeft(n)`
Rotating by a multiple of [Int.SIZE_BITS] (32) returns the same number, or more
generally
`number.rotateRight(n) == number.rotateRight(n % 32)`

@SinceKotlin("1.3")@ExperimentalStdlibApi public actual fun Int.rotateRight(bitCount: Int): Int =
    shl(Int.SIZE_BITS - bitCount) or ushr(bitCount)

Counts the number of set bits in the binary
representation of this [Long] number.

@SinceKotlin("1.3")@ExperimentalStdlibApi public actual fun Long.countOneBits(): Int =
    high.countOneBits() + low.countOneBits()

Counts the number
of consecutive most significant bits that are zero in the binary representation of this [Long] number.

@SinceKotlin("1.3")@ExperimentalStdlibApi public actual fun Long.countLeadingZeroBits(): Int =
    when (val high = this.high) {
        0 -> Int.SIZE_BITS + low.countLeadingZeroBits()
        else ->
            high.countLeadingZeroBits()
    }

Counts the number of consecutive least significant bits that are
zero in the binary representation of this [Long] number.

@SinceKotlin("1.3")@ExperimentalStdlibApi public actual fun Long.countTrailingZeroBits(): Int =
    when (val low = this.low) {
        0 -> Int.SIZE_BITS + high.countTrailingZeroBits()
