```

components/styled-components/issues/1941#issuecomment-417862021

"11": "\_This error was replaced with a dev-time warning, it will be deleted for v4 final. [createGlobalStyle] received children which will not be rendered. Please use the component without passing children elements."

"12": "It seems you are interpolating a keyframe declaration (%s) into an untagged string. This was supported in styled-components v3, but is not longer supported in v4 as keyframes are now injected on-demand. Please wrap your string in the css` helper which ensures the styles are injected correctly. See <https://www.styled-components.com/docs/api#css>"

"13": "%s is not a styled component and cannot be referred to via component selector. See <https://www.styled-components.com/docs/advanced#referring-to-other-components> for more details."

"14": "ThemeProvider: `theme` prop is required."

"15": "A stylis plugin has been supplied that is not named. We need a name for each plugin to be able to prevent styling collisions between different stylis configurations within the same app. Before you pass your plugin to `StyleSheetManager stylisPlugins={[]}>`, please make sure each plugin is uniquely-named, e.g. `Object.defineProperty(importedPlugin, 'name', { value: 'some-unique-name' });`"

"16": "Reached the limit of how many styled components may be created at group %s. You may only create up to 1,073,741,824 components. If you're creating components dynamically, for instance in your render method then you may be running into this limitation."

"17": "CSSStyleSheet could not be found on HTMLStyleElement. Has styled-components' style tag been unmounted or altered by another script?"

```

```

is only supported in a Node.js environment; Please do not try to call this method in the browser.

4: "The `StyleSheetManager` expects a valid target or sheet prop!

5: "The clone method cannot be used on the client!

6: "Trying to insert a new style tag, but the given Node is unmounted!

7: "ThemeProvider: Please return an object from your `theme` prop function, e.g. `js`  
`theme={ () => ({}) }`

8: "ThemeProvider: Please make your `theme` prop an object.

9: "Missing document ``"

10: "Cannot find a StyleSheet instance. Usually this happens if there are multiple copies of styled-components loaded at once. Check out this issue for how to troubleshoot and fix the common cases where this situation can happen: <https://github.com/styled-components/styled-components/issues/1941#issuecomment-417862021>

11: "\_ This error was replaced with a dev-time warning, it will be deleted for v4 final. `[createGlobalStyle]` received children which will not be rendered. Please use the component without passing children elements.

12: "It seems you are interpolating a keyframe declaration (%s) into an untagged string. This was supported in styled-components v3, but is not longer supported in v4 as keyframes are now injected on-demand. Please wrap your string in the `css`` helper which ensures the styles are injected correctly. See <https://www.styled-components.com/docs/api#css>

13: "%s is not a styled component and cannot be referred to via component selector. See <https://www.styled-components.com/docs/advanced#referring-to-other-components> for more details.

14: "ThemeProvider: `theme` prop is required.

15: "A stylis plugin has been supplied that is not named. We need a name for each plugin to be able to prevent styling collisions between different stylis configurations within the same app. Before you pass your plugin to `<StyleSheetManager stylisPlugins={[]}>`, please make sure each plugin is uniquely-named, e.g. `js`  
`Object.defineProperty(importedPlugin, 'name', { value: 'some-unique-name' });`

16: "Reached the limit of how many styled components may be created at group %s. You may only create up to 1,073,741,824 components. If you're creating components dynamically, as for instance in your render method then you may be running into this limitation.

17: "CSSStyleSheet could not be found on HTMLStyleElement.

Has styled-components' style tag been unmounted or altered by another script?

```

`@member {string} type` - String representing the node's type.  
Possible values are ``root``, ``atrule``, ``rule``, ``decl``, or ``comment``.

`@example` `postcss.decl({ prop: 'color', value: 'black' }).type` `//=> 'decl'`

`@memberof Node#` `parent` - the node's parent node.

`@example` `root.nodes[0].parent` `== root`

`@memberof Node#` `source` - the input source of the node  
The property is used in source map generation.  
If you create a node manually (e.g., with `postcss.decl()`), that node will not have a `source` property and will be absent from the source map. For this reason, the plugin developer should consider cloning nodes to create new ones (in which case the new node's source will reference the original, cloned node) or setting the `source` property manually.

`Bad` `const prefixed = postcss.decl({ prop: '-moz-' + decl.prop, value: decl.value });`  
`Good` `const prefixed = decl.clone({ prop: '-moz-' + decl.prop });`

`if ( atrule.name == 'add-link' ) {` `const rule = postcss.rule({ selector: 'a', source: atrule.source });` `atrule.parent.insertBefore(atrule, rule);` `}`

`@example` `decl.source.input.from` `//=> '/home/ai/a.sass'` `decl.source.start` `//=> { line: 10, column: 2 }` `decl.source.end` `//=> { line: 10, column: 12 }`

`@memberof Node#` `@member {object} raws` - Information to generate byte-to-byte equal node string as it was in the origin input.  
Every parser saves its own properties, but the default CSS parser uses:

- `before`: the space symbols before the node. It also stores ``*`` and ``_`` symbols before the declaration (IE hack).
- `after`: the space symbols after the last child of the node to the end of the node.
- `between`: the symbols between the property and value for declarations, selector and ``{`` for rules, or last parameter and ``{`` for at-rules.
- `semicolon`: contains true if the last child has an (optional) semicolon.
- `afterName`: the space between the at-rule name and its parameters.
- `left`: the space symbols between ``/*`` and the comment's text.
- `right`: the space symbols between the comment's text and `<code>*&#47;</code>`.
- `important`: the content of the important statement, if it is not just ``!important``.

PostCSS cleans selectors, declaration values and at-rule parameters from comments and extra spaces, but it stores origin content in `raws` properties. As such, if you don't change a declaration's value, PostCSS will use the raw value with comments.

`@example` `const root = postcss.parse('a { \n color:black\n })` `root.first.first.raws` `//=> { before: '\n ', between: '!' }`

`@flow` `nimport warnOnce` from `'./warn-once'`; `nimport Node` from `'./node'`;

Represents a CSS declaration.

`@extends Node`

`@example` `const root = postcss.parse('a { color: black }');` `const decl = root.first.first;` `decl.type` `//=> 'decl'` `decl.toString()` `//=> 'color: black'`

`class Declaration extends Node {` `constructor(defaults) {` `super(defaults);` `this.type = 'decl';` `}` `get _value()` `{` `warnOnce('Node#_value was deprecated. Use Node#raws.value');` `return this.raws.value;` `}` `set _value(val)` `{` `warnOnce('Node#_value was deprecated. Use Node#raws.value');` `this.raws.value = val;` `}` `get _important()` `{` `warnOnce('Node#_important was deprecated. Use Node#raws.important');` `return this.raws.important;` `}` `set _important(val)` `{` `warnOnce('Node#_important was deprecated. Use Node#raws.important');` `this.raws.important = val;` `}`

`@memberof Declaration#` `@member {string} prop` - the declaration's property name  
`@example` `const root = postcss.parse('a { color: black }');` `const decl = root.first.first;` `decl.prop` `//=> 'color'`

`@memberof Declaration#` `@member {string} value` - the declaration's value  
`@example` `const root = postcss.parse('a { color: black }');` `const decl = root.first.first;` `decl.value` `//=> 'black'`

`@memberof Declaration#` `@member {boolean} important` - ``true`` if the declaration has an `!important` annotation.  
`@example` `const root = postcss.parse('a { color: black !important; color: red }');` `root.first.first.important` `//=> true` `root.first.last.important` `//=> undefined`

`@memberof Declaration#` `@member {object} raws` - Information to generate byte-to-byte equal node string as it was in the origin input.  
Every parser saves its own properties, but the default CSS parser uses:

- `before`: the space symbols before the node. It also stores ``*`` and ``_`` symbols before the declaration (IE hack).
- `between`: the symbols between the property and value for declarations, selector and ``{`` for rules, or last parameter and ``{`` for at-rules.
- `important`: the content of

the important statement, but it stores origin content in raws properties. As such, if you don't change a declaration's value, PostCSS will use the raw value with comments. @example const root = postcss.parse('a { color:black}').root.first.first.raws // => { before: '\n ', between: ' ' } \n\n\nexport default Declaration; \n\n\n// @flow\nimport warnOnce from './warn-once';\nimport Node from './node';\n\n/\*\*\n \* Represents a comment between declarations or statements (rule and at-rules).\n \* Comments inside selectors, at-rule parameters, or declaration values will be stored in the `raws` properties explained above.\n \* @extends Node\n \* \n class Comment extends Node {\n constructor(defaults) {\n super(defaults);\n this.type = 'comment';\n }\n get left() {\n warnOnce('Comment#left was deprecated. node\n * @param {Node} node - AST node\n * @param {"start"|"end"} [type] - node's part type\n
*\n\n /**\n * @callback parser\n * \n * @param {string|toString} css - string with input CSS or any object\n *
with toString() method, like a Buffer\n * @param {processOptions} [opts] - options with only `from`
and `map` keys\n * \n * @return {Root} PostCSS AST\n * \n\n /**\n * @callback stringifier\n * \n * @param {Node}

```

node - start node for stringifying. Usually { @link Root }.  
 CSS from node's parts  
 \* @typedef {object} syntax  
 \* @property {parser} parse - function to generate AST by string  
 \* @property {stringifier} stringify - function to generate string by AST  
 \* @property {function} toString  
 \* @callback pluginFunction  
 \* @param {Root} root - parsed input CSS  
 \* @param {Result} result - result to set warnings or check other plugins  
 \* @typedef {object} Plugin  
 \* @property {function} postcss - PostCSS plugin function  
 processOptions  
 \* @property {string} from - the path of the CSS source file  
 You should always set `from` because it is used in source map generation and syntax error messages.  
 \* @property {string} to - the path where you'll put the output CSS file. You should always set `to` to generate correct source maps.  
 \* @property {parser} parser - function to generate AST by string  
 \* @property {stringifier} stringifier - class to generate string by AST  
 \* @property {syntax} syntax - object with `parse` and `stringify`  
 \* @property {object} map - source map options  
 \* @property {boolean} map.inline - does source map should be embedded in the output  
 CSS as a base64-encoded comment  
 \* @property {string|object|false|function} map.prev - source map content from a previous processing step (for example, Sass).  
 \* @property {string} map.postcss - PostCSS will try to find previous map automatically, so you could disable it by `false` value.  
 \* @property {boolean} map.sourcesContent - does PostCSS should set the origin content to map  
 \* @property {string|false} map.annotation - does PostCSS should set annotation comment to map  
 \* @property {string} map.from - override `from` in map's `sources`  
 Contains plugins to process CSS. Create one `Processor` instance, initialize its plugins, and then use that instance on numerous CSS files.  
 \* @example  
 const processor = postcss([autoprefixer, precss]);  
 processor.process(css1).then(result => console.log(result.css));  
 processor.process(css2).then(result => console.log(result.css));  
 \* @class Processor  
 \* @param {Array.<Plugin|pluginFunction>} plugins - PostCSS plugins. See { @link Processor#use } for plugin format.  
 \* @constructor(plugins = [])  
 \* @member {string} - Current PostCSS version.  
 \* @example  
 if (result.processor.version.split('.')[0] !== '5') {  
 \* throw new Error('This plugin works only with PostCSS 5');  
 \* }  
 \* this.version = '5.2.0';  
 \* @member {pluginFunction[]} - Plugins added to this processor.  
 \* @example  
 const processor = postcss([autoprefixer, precss]);  
 processor.plugins.length // => 2  
 \* this.plugins = this.normalize(plugins);  
 \* }  
 \* Adds a plugin to be used as a CSS processor.  
 \* PostCSS plugin can be in 4 formats:  
 \* \* A plugin created by { @link postcss.plugin } method.  
 \* \* A function. PostCSS will pass the function a { @link Root } as the first argument and current { @link Result } instance as the second.  
 \* \* An object with a `postcss` method. PostCSS will use that method as described in #2.  
 \* \* Another { @link Processor } instance. PostCSS will copy plugins from that instance into this one.  
 \* \* Plugins can also be added by passing them as arguments when creating a `postcss` instance (see [ postcss(plugins) ] ).  
 \* \* Asynchronous plugins should return a `Promise` instance.  
 \* @param {Plugin|pluginFunction|Processor} plugin - PostCSS plugin or { @link Processor }  
 \* with plugins  
 \* @example  
 const processor = postcss()  
 \* .use(autoprefixer)  
 \* .use(precss);  
 \* @return {Processes} current processor to make methods chain  
 \* use(plugin) {  
 \* this.plugins = this.plugins.concat(this.normalize([plugin]));  
 \* return this;  
 \* }  
 \* }  
 Parses source CSS and returns a { @link LazyResult } Promise proxy. Because some plugins can be asynchronous it doesn't make any transformations. Transformations will be applied in the { @link LazyResult } methods.  
 \* @param {string|toString|Result} css - String with input CSS or any object with a `toString()` method, like a Buffer.

```

@member {string} type - String representing the node's type.\n *
Possible values are `root`,
`atrule`, `rule`,\n *
`decl`, or `comment`.\n *
@example\n * postcss.decl({ prop: 'color',
value: 'black' }).type //=> 'decl'\n *
@example\n * @memberof Node#\n * @member {Container} parent - the
node's parent node.\n *
@example\n * root.nodes[0].parent == root;\n *
@example\n * @memberof
Node#\n * @member {source} source - the input source of the node\n *
The property is used in source map
generation.\n *
If you create a node manually (e.g., with `postcss.decl()`),\n *
that node will not have a
`source` property and will be absent\n *
from the source map. For this reason, the plugin developer should\n *
consider cloning nodes to create new ones (in which case the new node's\n *
source will reference the original,
cloned node) or setting\n *
the `source` property manually.\n *
@example\n * // Bad\n * const prefixed =
postcss.decl({\n * prop: '-moz-' + decl.prop,\n * value: decl.value\n * });\n *
@example\n * // Good\n * const prefixed =
decl.clone({\n * prop: '-moz-' + decl.prop\n * });\n *
@example\n * // Bad\n * if (atrule.name === 'add-link') {\n * const
rule = postcss.rule({\n * selector: 'a',\n * source: atrule.source\n * });\n * atrule.parent.insertBefore(atrule, rule);\n * }\n *
@example\n * decl.source.input.from //=> '/home/ai/a.sass'\n *
decl.source.start //=> { line: 10,\n *
column: 2 }\n *
decl.source.end //=> { line: 10, column: 12 }\n *
@example\n * @memberof Node#\n *
@member {object} raws - Information to generate byte-to-byte equal\n *
node string as it was in the
origin input.\n *
Every parser saves its own properties,\n *
but the default CSS parser uses:\n *
`before`: the space symbols before the node. It also stores ` ` and ` ` symbols before the declaration (IE
hack).\n *
`after`: the space symbols after the last child of the node\n *
to the end of the node.\n *
`between`: the symbols between the property and value\n *
for declarations, selector and `{` for rules, or last
parameter\n *
and `{` for at-rules.\n *
`semicolon`: contains true if the last child has\n *
an (optional)
semicolon.\n *
`afterName`: the space between the at-rule name and its parameters.\n *
`left`: the space
symbols between `/*` and the comment's text.\n *
`right`: the space symbols between the comment's text\n *
and /.\n *
`important`: the content of the important statement,\n *
if it is not just
`!important`.\n *
PostCSS cleans selectors, declaration values and at-rule parameters\n *
from comments and
extra spaces, but it stores origin content in raws\n *
properties. As such, if you don't change a declaration's
value,\n *
PostCSS will use the raw value with comments.\n *
@example\n * const root = postcss.parse('a
{\\n color:black\\n}')\n *
root.first.first.raws //=> { before: '\\n ', between: ' ' }\n *
@example\n * Represents a CSS
declaration.\n *
@example\n * const root = postcss.parse('a { color: black }');\n *
const
decl = root.first.first;\n *
decl.type //=> 'decl'\n *
decl.toString() //=> ' color: black'\n *
class Declaration

**\n * @callback childCondition\n * @param {Node} node - container child\n * @param {number} index - child
index\n * @param {Node[]} nodes - all container children\n * @return {boolean}\n * \n\n**\n * @callback
childIterator\n * @param {Node} node - container child\n * @param {number} index - child index\n * @return
{false|undefined} returning `false` will break iteration\n * \n\n**\n * The { @link Root }, { @link AtRule }, and
{ @link Rule } container nodes\n * inherit some common methods to help work with their children.\n * \n\n * Note that

```

all containers can store any content. If you write a rule inside a rule, PostCSS will parse it.

```

@extends
Node
@abstract
class Container extends Node {
 push(child) {
 child.parent = this;
 this.nodes.push(child);
 return this;
 }
}
/**
 * Iterates through the container's immediate children,
 * calling `callback` for each child.
 * Returning `false` in the callback will break iteration.
 * This method only iterates through the container's immediate children.
 * If you need to recursively iterate through all
 * the container's descendant nodes, use {@link Container#walk}.
 * Unlike the for `{}-cycle` or
 * `Array#forEach` this iterator is safe
 * if you are mutating the array of child nodes during iteration.
 * PostCSS will adjust the current index to match the mutations.
 * @param {childIterator} callback - iterator receives
 * each node and index
 * @return {false|undefined} returns `false` if iteration was broke
 * @example
 * const root = postcss.parse('a { color: black; z-index: 1 }');
 * const rule = root.first;
 * for (
 * let decl of rule.nodes) {
 * decl.cloneBefore({ prop: '-webkit-' + decl.prop });
 * // Cycle will be infinite,
 * // because cloneBefore moves the current node
 * // to the next index
 * rule.each(decl => {
 * decl.cloneBefore({ prop: '-webkit-' + decl.prop });
 * // Will be executed only for color and z-index
 * });
 * each(callback) {
 * if (!this.lastEach) this.lastEach = 0;
 * if (!this.indexes) this.indexes = {};
 * this.lastEach += 1;
 * const id = this.lastEach;
 * this.indexes[id] = 0;
 * if (!this.nodes) return undefined;
 * let index, result;
 * while (this.indexes[id] < this.nodes.length) {
 * index = this.indexes[id];
 * result =
 * callback(this.nodes[index], index);
 * if (result === false) break;
 * this.indexes[id] += 1;
 * }
 * delete
 * this.indexes[id];
 * return result;
 * }
}
/**
 * Traverses the container's descendant nodes, calling callback
 * for each node.
 * Like container.each(), this method is safe
 * if you are mutating arrays during
 * iteration.
 * If you only need to iterate through the container's immediate children,
 * use {@link
 * Container#each}.
 * @param {childIterator} callback - iterator receives each node and index
 * @return {false|undefined} returns `false` if iteration was broke
 * @example
 * root.walk(node => {
 * // Traverses all descendant nodes.
 * });
 * walk(callback) {
 * return this.each((child, i) => {
 * let result
 * = callback(child, i);
 * if (result !== false && child.walk) {
 * result = child.walk(callback);
 * }
 * return
 * result;
 * });
}
/**
 * Traverses the container's descendant nodes, calling callback
 * for each
 * declaration node.
 * If you pass a filter, iteration will only happen over declarations
 * with matching
 * properties.
 * Like {@link Container#each}, this method is safe
 * to use if you are mutating arrays during
 * iteration.
 * @param {string|RegExp} [prop] - string or regular expression
 * to
 * filter declarations by property name
 * @param {childIterator} callback - iterator receives each node and index
 * @return {false|undefined} returns `false` if iteration was broke
 * @example
 * root.walkDecls(decl => {
 * checkPropertySupport(decl.prop);
 * });
 * root.walkDecls('border-radius',
 * decl => {
 * decl.remove();
 * });
 * root.walkDecls(/^background/, decl => {
 * decl.value =
 * takeFirstColorFromGradient(decl.value);
 * });
 * walkDecls(prop, callback) {
 * if (!callback) {
 * callback = prop;
 * return this.walk((child, i) => {
 * if (child.type === 'decl') {
 * return callback(child,
 * i);
 * }
 * });
 * } else if (prop instanceof RegExp) {

## 1.615 node-forge 1.3.1

### 1.615.1 Available under license :

You may use the Forge project under the terms of either the BSD License or the GNU General Public License (GPL) Version 2.

The BSD License is recommended for most projects. It is simple and easy to understand and it places almost no restrictions on what you can do with the Forge project.

If the GPL suits your project better you are also free to use Forge under that license.

You don't have to do anything special to choose one license or the other and you don't have to notify anyone which license you are using. You are free to use this project in commercial projects as long as the copyright header is left intact.

If you are a commercial entity and use this set of libraries in your commercial software then reasonable payment to Digital Bazaar, if you can afford it, is not required but is expected and would be appreciated. If this library saves you time, then it's saving you money. The cost of developing the Forge software was on the order of several hundred hours and tens of thousands of dollars. We are attempting to strike a balance between helping the development community while not being taken advantage of by lucrative commercial entities for our efforts.

## Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software

patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in

whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium

customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to

this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program

specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## 1.729 @ampproject/remapping 2.2.0

### 1.729.1 Available under license :

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems,

and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

#### END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but

excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. **Grant of Copyright License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. **Grant of Patent License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. **Redistribution.** You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  - (d) If the Work includes a "NOTICE" text file as part of its

distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise,

unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

[Read more about CC0.](<http://creativecommons.org/publicdomain/zero/1.0/>)

You can find its legal text below.

#### Creative Commons Zero v1.0 Universal

CC0 1.0 Universal

Statement of Purpose

The laws of most jurisdictions throughout the world automatically confer exclusive Copyright and Related Rights (defined below) upon the creator and subsequent owner(s) (each and all, an "owner") of an original work of

authorship and/or a database (each, a "Work").

Certain owners wish to permanently relinquish those rights to a Work for the purpose of contributing to a commons of creative, cultural and scientific works ("Commons") that the public can reliably and without fear of later claims of infringement build upon, modify, incorporate in other works, reuse and redistribute as freely as possible in any form whatsoever and for any purposes, including without limitation commercial purposes. These owners may contribute to the Commons to promote the ideal of a free culture and the further production of creative, cultural and scientific works, or to gain reputation or greater distribution for their Work in part through the use and efforts of others.

For these and/or other purposes and motivations, and without any expectation of additional consideration or compensation, the person associating CC0 with a Work (the "Affirmer"), to the extent that he or she is an owner of Copyright and Related Rights in the Work, voluntarily elects to apply CC0 to the Work and publicly distribute the Work under its terms, with knowledge of his or her Copyright and Related Rights in the Work and the meaning and intended legal effect of CC0 on those rights.

1. Copyright and Related Rights. A Work made available under CC0 may be protected by copyright and related or neighboring rights ("Copyright and Related Rights"). Copyright and Related Rights include, but are not limited to, the following:

- i. the right to reproduce, adapt, distribute, perform, display, communicate, and translate a Work;
- ii. moral rights retained by the original author(s) and/or performer(s);
- iii. publicity and privacy rights pertaining to a person's image or likeness depicted in a Work;
- iv. rights protecting against unfair competition in regards to a Work, subject to the limitations in paragraph 4(a), below;
- v. rights protecting the extraction, dissemination, use and reuse of data in a Work;
- vi. database rights (such as those arising under Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, and under any national implementation thereof, including any amended or successor version of such directive); and
- vii. other similar, equivalent or corresponding rights throughout the world based on applicable law or treaty, and any national implementations thereof.

2. Waiver. To the greatest extent permitted by, but not in contravention of, applicable law, Affirmer hereby overtly, fully, permanently, irrevocably and unconditionally waives, abandons, and surrenders all of Affirmer's Copyright and Related Rights and associated claims and causes of action, whether now known or unknown (including existing as well as future claims and causes of action), in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "Waiver"). Affirmer makes the Waiver for the benefit of each member of the public at large and to the detriment of Affirmer's heirs and successors, fully intending that such Waiver shall not be subject to revocation, rescission, cancellation, termination, or any other legal or equitable action to disrupt the quiet enjoyment of the Work by the public as contemplated by Affirmer's express Statement of Purpose.

3. Public License Fallback. Should any part of the Waiver for any reason be judged legally invalid or ineffective under applicable law, then the Waiver shall be preserved to the maximum extent permitted taking into account Affirmer's express Statement of Purpose. In addition, to the extent the Waiver is so judged Affirmer hereby grants to each affected person a royalty-free, non transferable, non sublicensable, non exclusive, irrevocable and unconditional license to exercise Affirmer's Copyright and Related Rights in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "License"). The License shall be deemed effective as of the date CC0 was applied by Affirmer to the Work. Should any part of the License for any reason be judged legally invalid or ineffective under applicable law, such partial invalidity or ineffectiveness shall not invalidate the remainder of the License, and in such case Affirmer hereby affirms that he or she will not (i) exercise any of his or her remaining Copyright and Related Rights in the Work or (ii) assert any associated claims and causes of action with respect to the Work, in either case contrary to Affirmer's express Statement of Purpose.

4. Limitations and Disclaimers.

a. No trademark or patent rights held by Affirmer are waived, abandoned, surrendered, licensed or otherwise affected by this document.

b. Affirmer offers the Work as-is and makes no representations or warranties of any kind concerning the Work, express, implied, statutory or otherwise, including without limitation warranties of title, merchantability, fitness for a particular purpose, non infringement, or the absence of latent or other defects, accuracy, or the present or absence of errors, whether or not discoverable, all to the greatest extent permissible under applicable law.

c. Affirmer disclaims responsibility for clearing rights of other persons that may apply to the Work or any use thereof, including without limitation any person's Copyright and Related Rights in the Work. Further, Affirmer disclaims responsibility for obtaining any necessary consents, permissions or other rights required for any use of the Work.

d. Affirmer understands and acknowledges that Creative Commons is not a party to this document and has no duty or obligation with respect to this CC0 or use of the Work.
