Cisco Aironet 700 Series Access Point

RF Excellence

Building on the Cisco Aironet heritage of RF excellence, the 700 Series Access Point delivers secure and reliable wireless connections with:

"/1,1/1, CISCO

- Simultaneous dual band, dual radio with support for 2.4GHz and 5GHz
- Optimized antenna and radio designs: Consistent network transmit and receive for optimized rate versus range
- Radio resource management (RRM): Automated self-healing optimizes the unpredictability of RF to reduce dead spots and help ensure high-availability client connections
- · Cisco BandSelect improves 5-GHz client connections in mixed-client environments

• Advanced security features including Rogue Detection, wIPS and Context-Aware

Scalability

The Cisco Aironet 700 Series is a component of the Cisco Unified Wireless Network, which can provide full Layer 3 mobility across central or remote locations on the enterprise campus, in branch offices, and at remote sites. The Cisco Unified Wireless Network is the industry's most flexible, resilient, and scalable architecture delivering secure access to mobility services and applications, and offering the lowest total cost of ownership and investment protection by integrating seamlessly with the existing wired network.

Product Specifications

Table 1 lists the product specifications for Cisco Aironet 700 Series Access Points.

Table 1. Pro	duct Specifications for Cisco Aironet 700 Series Access Points
--------------	--

ltem	Specification
Part Numbers	Specification The Cisco Aironet 700 Access Point: Indoor environments, with internal antennas • AIR-CAP702I-x-K9 • Dual-band controller-based 802.11a/g/n • AIR-CAP702I-xK910 • Eco-pack (dual-band controller-based 802.11a/g/n) 10 quantity access points • AIR-SAP702I-xK9 • Dual-band stand-alone 802.11a/g/n • AIR-SAP702I-xK9-5 • Multi-unit pack (dual-band stand-alone 802.11a/g/n) • AIR-SAP702I-xK9-5 • Multi-unit pack (dual-band stand-alone 802.11a/g/n) • AIR-SAP702I-xK9-5 • Multi-unit pack (dual-band stand-alone 802.11a/g/n) • CON-SNT-AIRCAP7x - SMARTnet 8x5xNBD 702i access point (dual-band 802.11 a/g/n) controller-based (e.g. CON-SNT-AIRCAP7x for controller-based 702i internal antenna for A Domain) Cisco Wireless LAN Services
	 AS-WLAN-CNSLT - <u>Cisco Wireless LAN Network Planning and Design Service</u> AS-WLAN-CNSLT - <u>Cisco Wireless LAN 802.11n Migration Service</u> AS-WLAN-CNSLT - <u>Cisco Wireless LAN Performance and Security Assessment Service</u> Regulatory domains: (x = regulatory domain) Customers are responsible for verifying approval for use in their individual countries. To verify approval and to identify the regulatory domain that corresponds to a particular country, please visit: <u>http://www.cisco.com/go/aironet/compliance</u>. Not all regulatory domains have been approved. As they are approved, the part numbers will be available on the Global Price List.
Software	 Cisco Unified Wireless Network Software Release 7.5 or later (controller-based) Cisco IOS[®] Software (stand-alone)
Deployment Modes	Controller-based, FlexConnect, Monitor, Converged Access and Autonomous
802.11n	 2 x 2 multiple-input multiple-output (MIMO) with two spatial streams Maximal ratio combining (MRC) 20- and 40-MHz channels PHY data rates up to 300 Mbps Packet aggregation: A-MPDU (Tx/Rx), A-MSDU (/Rx) 802.11 dynamic frequency selection (DFS) Cyclic shift diversity (CSD) support

¹ 2.4 GHz does not support 40 MHz.

³ GI: A Guard Interval (GI) between symbols helps receivers overcome the effects of multipath delays.

ltem	Specification					
Data Rates Supported	802.11a: 6, 9, 12, 18, 2	4, 36, 48, 54 Mbps

Limited Lifetime Hardware Warranty

The Cisco Aironet 700 Series Access Point comes with a Limited Lifetime Warranty that provides full warranty coverage of the hardware for as long as the original end user continues to own or use the product. The warranty includes 10-day advance hardware replacement and ensures that software media is defect-free for 90 days. For more details, visit: <u>http://www.cisco.com/go/warranty</u>.

Cisco Wireless LAN Services

Realize the full business value of your technology investments faster with intelligent, customized services from Cisco and our partners. Backed by deep networking expertise and a broad ecosystem of partners, Cisco Wireless LAN Services enable you to deploy a sound, scalable mobility network that enables rich media collaboration while improving the operational efficiency gained from a converged wired and wireless network infrastructure based on the Cisco Unified Wireless Network. Together with partners, we offer expert plan, build, and run services to accelerate your transition to advanced mobility services while continuously optimizing the performance, reliability, and security of that architecture after it is deployed. For more details, visit: <u>http://www.cisco.com/go/wirelesslanservices</u>.

For More Information

For more information about the Cisco Aironet 700 Series, visit <u>http://www.cisco.com/go/wireless</u> or contact your local account representative.
