Introduction

This document describes the operating system compatibility for supported versions of the Secure Endpoint Windows Connector.

Note: Private Cloud supports Windows Connector versions up to 8.2.3.

Windows support for Secure Endpoint Windows Connector Version 8.x (64-bit only)

Beginning in 8.0.1, Cisco Secure Endpoint Windows Connector only supports installation on 64-bit versions of the operating system.

Installation on 32-bit versions of the operating system need to use the Cisco Secure Endpoint for Windows 7.x versions.

ARM-based Windows is not supported at the moment.

Windows Name	Version	8.4.0	8.2.4	8.2.3	8.2.1	8.1.7 ¹
	Release Date	2024-05-14	2024-03-18	2024-02-12	2023-09-11	2023-07-04
Windows 11	All					
Windows 10	22H2					
	21H2					
	21H1					
	20H2					
	2004					

	1909					
	1903 or ealier					
	IoT ²					
Windows 10 LTSC	2021					
	2019					
Windows 10 LTSB	2016					
	2015					
Windows Server ³	2022					
	2019					
	2016					

¹ As of connector version 8.1.3, installation requires OS patches with Azure Code Signed as required by Microsoft. See [Windows Support-for-Azure code signing](#).

² The connector on Windows 10 IoT Enterprise does not support HORM, UWF, and the Kenna Risk Score. See [Incompatible Software and Configurations](#).

³ Support includes both Desktop UI and Core editions.

Legacy Windows support for Secure Endpoint Windows Connector 7.x (64-bit or 32-bit)

Installation on 32-bit versions of the operating system need to use the Cisco Secure Endpoint Windows Conector 7.x versions. This version of the connector also supports 64-bit versions of the operating systems.

Updates for legacy operating systems only provide critical fixes and technical support until official end-of-support is announced by Cisco for the operating system and the connector version.

Windows Name	Version	7.5.17	7.5.15	7.5.13 ¹
	Release Date	2023-11-27	2023-09-11	2023-08-15
Windows 11	All			
Windows 10	22H2			
	21H2			

	21H1			
	20H2			
	2004			
	1909			
	1903 or earlier			
	IoT ²			
Windows 10 LTSC	2021			
	2019			
Windows 10 LTSC	2016			
	2015			
Windows 8	8.1			
Windows 7	SP1, ESU			
Windows Server ³	2022			
	2019			
	2016			
	2012 R2			

	2012			
	2008 R2, ESU			

¹ As of 7.5.7, installation requires OS patches with Azure Code Signed as required by Microsoft. See [Windows Support-for-Azure code signing](#).

² The connector on Windows 10 IoT Enterprise does not support HORM, UWF, and the Kenna Risk Score. See [Incompatible Software and Configurations](#).

³ Support includes both Desktop UI and Core editions.
