Table 1: New Software Features

Feature	Description
Cisco Managed Cellular Activation (eSIM)	<p>The Managed Cellular Activation solution provides a programmable subscriber identity module (SIM), called an eSIM, a physical SIM card that you can configure with a cellular service plan of your choice. When ordering a pluggable interface module (PIM) to provide cellular connectivity for your router, choose a PIM model with a preinstalled eSIM. The Managed Cellular Activation solution comes with a “bootstrap” cellular plan to provide internet connectivity with a limited amount of data intended only for Day 0 onboarding of the device to your cellular plan. For information about configuring Cisco SD-WAN Manager with the details of your cellular plan in preparation for onboarding the device, see the Cisco Managed Cellular Activation Configuration Guide. Prepare the configuration in Cisco SD-WAN Manager before powering on and onboarding the device, to avoid running out of the limited data in the bootstrap cellular plan.</p> <p>Added Cisco Managed Cellular Activation (eSIM) support for the following Pluggable Interface Module (PIM) models:</p> <ul style="list-style-type: none"> • 5G Sub-6 GHz PIM, model P-5GS6-R16-GL • LTE CAT 18 PIM, model P-LTEAP18-GL • LTE CAT 6 PIM, models P-LTEA-EA, P-LTEA-LA • LTE CAT 7 PIM, models P-LTEA7-NA, P-LTEA7-EAL, P-LTEA7-JP <p>Note In this context, eSIM refers to a removable SIM pre-installed by Cisco. In other contexts, eSIM can refer to a non-removable SIM embedded in a cellular-enabled device.</p>
